How to read this document

[Placeholder] A fact only the company can supply (regulator, licence, address, client numbers). Never publish with brackets.

1.0 pips A proposed product parameter from the platform spec. Verify against the admin configuration before launch.

Framed text Final, publish-ready copy. Use it verbatim; the developer should not rewrite it.

Button → target A CTA label and its link target. **Secondary** Text link

01

Foundations

Brand, voice, sitemap and the global elements that appear on every page.

START HERE

About this document

This is the single source of truth for building [kalks.com](#), the public marketing website for Kalks. It holds final copy, SEO metadata, page structure, imagery direction and developer notes for every public page. Build from it directly. Copy in framed blocks is final and should be used word for word.

Scope

The website is the public front door. It explains Kalks and turns visitors into registered clients and partners. Every sign-up, log-in, deposit, trading and account-management action happens in the Client Area at [app.kalks.com](#) or in the Web Terminal at [trade.kalks.com](#). The website never handles credentials, money or personal data beyond analytics consent and the contact form.

SURFACE	DOMAIN	ROLE	OWNED BY THIS SPEC?
Marketing website	kalks.com	Public pages, SEO, education, conversion	Yes
Client Area (CRM)	app.kalks.com	Registration, KYC, wallet, accounts, IB, copy, PAMM, prop	No: only link targets
Web Terminal	trade.kalks.com	Charts and order execution	No: only link targets
API and docs portal	api.kalks.com	REST/WebSocket/FIX docs, sandbox	No: only link targets
Status page	status.kalks.com	Public uptime and incidents	No: link from footer

Conventions

- Framed copy** (ember left rule) is final. Do not paraphrase it. Translators work from the English source in the i18n catalogue.
- Bracketed fields** (shown [like this]) are facts only the company can supply, such as regulator, licence number, address and client numbers. A build that still contains brackets must fail the release checklist (Appendix D6).
- Dotted-underlined values** are proposed product parameters from the platform specification (decisions D1–D150) and the Client Area mock data. Verify each one against the live admin configuration, and wherever possible render it from the config/pricing API so the website never contradicts the platform.
- CTA notation**: every button shows its label and link target. External targets open in the same tab (the Client Area is part of the same brand journey), except PDFs and third-party links.
- Section numbers** (01, 02...) give the render order from top to bottom of the page.
- SEO limits**: the build script checks every SEO title (60 characters or fewer) and meta description (155 or fewer); the counters are printed beside each field.

Compliance principles for all copy

- No guaranteed-profit, “risk-free”, “easy money” or income-promise language anywhere, including image alt text and ad landing pages.
- Every page that shows a leveraged product carries the global risk banner. Pages about copy trading, PAMM, prop challenges, bonuses and contests also carry their own risk note, as specified on each page.
- Do not publish regulator names, licence numbers, awards, client counts, trading volumes or testimonials until they are real, verified and approved by compliance. The fields for them exist in this document as placeholders.
- Execution model: Kalks acts as the counterparty to client trades at launch (see D2 and D25). Copy must never claim “no dealing desk”, “true ECN”, “STP only” or “we never trade against you”. The ECN account name describes its pricing model (raw spread plus commission); counsel should confirm the name is acceptable in each target jurisdiction.
- Performance figures for masters, PAMM funds and strategies must be labelled “past performance is not a reliable indicator of future results”.

DEVELOPER NOTE

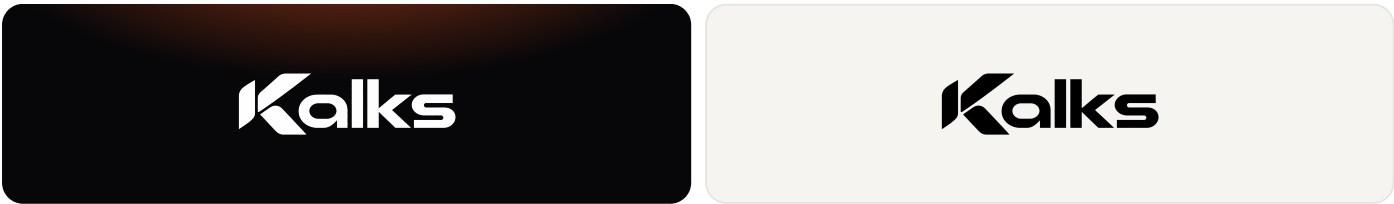

Kalks is tenant #1 of a white-label platform (D1). Build every brand-specific string, colour, logo and legal field from a single `brand.config.ts` so a second tenant can reuse the site by swapping config and copy catalogues.

REF A2

BRAND

Brand summary

Kalks is a global multi-asset broker for traders who take precision seriously. The brand should feel like a private trading floor at night: dark, calm and warm, with an ember glow, gold highlights, and numbers that are sharp enough to trust.

Positioning

Category	Global multi-asset online broker: Forex, Metals, Indices, Energies, Crypto CFDs and Stock CFDs, plus copy trading, PAMM, prop challenges and an API for algorithmic traders.
Audience	Primary: self-directed retail traders aged 22–45 in Asia, the Middle East, Africa and Latin America who already trade or are ready to. Secondary: introducing brokers, signal providers and strategy developers, and algorithmic and small institutional traders who need API/FIX access.
Promise	Institutional-grade tools and clear conditions, from a \$10 first deposit.
Proof points	Four account types (Standard, Pro, ECN, Cent); raw spreads from 0.0 pips on ECN; leverage up to 1:2000 on Cent; USDT-TRC20 funding with no deposit fee from Kalks; a web terminal with in-house charting; REST, WebSocket and FIX 4.4 API; copy trading, PAMM and prop challenges in one Client Area; 20+ languages; negative balance protection.
Personality	Premium, institutional, precise, calm, candid.
Tagline	Precision, in every market.
Alternate lines	“Built for traders who read the decimals.” · “Global markets. One precise account.” · “Trade with intent.”

Visual identity (summary; tokens in Appendix D2)

- Canvas:** near-black ink #07070A with one warm ember glow bleeding in from the top of every page (--bg-glow), fading to black within about 400px. The website is dark-first; a light theme is optional for long-form legal and academy reading.
- Accents:** ember #FF5A1F for primary CTAs, active states and glow; gold #E9B949 for premium elements (Pro/ECN badges, prop, partner levels, chart lines). Green #22C55E and red #F04438 are reserved for price direction and profit/loss. Never use them decoratively.
- Type:** Geist for UI and headlines; Geist Mono for prices, logins, hashes and spec tables. Big numbers use tabular figures with dimmed decimals, e.g. 2,654.30.
- Shapes:** 20px card radius, pill (999px) buttons and chips, 1px hairline borders that are brighter on the top edge, no hard drop shadows in dark mode.
- Imagery:** real photography of skylines, trading desks and people at work, graded dark with an ember tint, plus 3D glossy accents (gold coins, shield, trophy, rocket) used sparingly. No purple/violet, no blue-SaaS gradients, no stock “handshake” clichés, no emoji.
- Motion:** a slow breathing glow (8s), counting numbers, price digits that flash green/red when they change, cards that rise 12px with a 50ms stagger, and a CTA shimmer every 6s. All of it honours prefers-reduced-motion.

Logo usage

- Files: brand/kalks_logo_white.png (on dark) and brand/kalks_logo_black.png (on light). Request SVG masters from the designer before launch; PNG is the fallback.
- Never redraw, recolour, stretch, outline or add effects to the wordmark. Minimum clear space equals the height of the “K”. Minimum width is 88px on screen.
- The favicon and app icon use the K glyph alone, white on #1E1E24 with a faint ember glow, rounded square.

REF A3 BRAND

Voice & tone guide

Kalks speaks like a senior trader explaining a desk to a capable colleague: direct, exact and unhurried. Confidence comes from specifics, not superlatives.

Voice principles

PRINCIPLE	WHAT IT MEANS	EXAMPLE
Precise	Numbers, units and conditions beat adjectives. Say what a thing is and what it costs.	“Raw spreads from 0.0 pips plus \$3.50 per lot per side.” Not “ultra-low spreads”.
Calm	No hype, no exclamation marks, no urgency tricks. Markets are exciting enough.	“Open an account in about three minutes.” Not “Start NOW!!!”
Candid	Name the risk, the fee and the condition in the same breath as the benefit.	“Copy trading automates decisions, not outcomes. You can lose money copying any strategy.”
Institutional	Use the vocabulary of the trade correctly and explain it once, briefly.	“Hedging mode lets you hold buy and sell positions on the same symbol at the same time.”
Global	Short sentences, plain English, no idioms, slang or culture-specific jokes. Everything must translate cleanly into 20+ languages and RTL.	“Withdraw to your own USDT-TRC20 wallet.” Not “cash out in a snap”.

Tone by context

CONTEXT	TONE	NOTES
Hero and campaign headlines	Confident, short, specific	Max 8 words. One idea. Lead with the outcome or the number.
Product explanations	Clear and instructive	Use “you”. Steps are numbered. One sentence per idea.
Risk, legal, compliance	Plain and serious	Never soften or hide it. Same font size as body copy on the page.

CONTEXT	tone	NOTES
Errors and 404	Helpful, lightly warm	Explain what happened and give a next step. No jokes about losing money.
Partners (IB)	Businesslike	Talk about economics, tools and payment reliability, not “passive income”.

Words to use and words to avoid

Use

- precise, precision, clear, transparent, exact
- trade, trader, position, execution, spread, commission, swap
- from 0.0 pips, up to 1:2000 (always “from” / “up to”)
- tools, conditions, control, protect, verify
- Client Area, Web Terminal, Strategy Builder (proper nouns, capitalised)
- USDT-TRC20 (always with the network)
- may, can, could (for outcomes)
- negative balance protection
- past performance is not a reliable indicator of future results
- simulated (for prop funded accounts)

Avoid

- guaranteed, risk-free, safe investment, sure profit, get rich
- passive income, financial freedom, quit your job
- best broker, #1, world-leading, award-winning (unless verified and sourced)
- no dealing desk, true ECN, STP-only, we never trade against you
- instant withdrawals (withdrawals are reviewed; say “fast” with a time range)
- free money, bonus cash (bonuses are non-withdrawable credit)
- insured, protected by government (unless verified)
- crypto “coins” for CFDs (say “crypto CFDs”; clients do not own the coin)
- revolutionary, next-gen, game-changing, unleash, supercharge
- exclamation marks, ALL CAPS, emoji

Style rules

- Sentence case for headlines and buttons (“Open live account”, not “Open Live Account”).
- Buttons start with a verb: Open, Try, Start, Explore, Compare, Download, Contact. Two to four words.
- Numbers: always digits (“3 steps”), thousands separators (1,000), “1:500” for leverage, “\$3.50” for money, “0.0 pips”, “24/5”, “GMT+2/+3” for server time.
- Symbol names exactly as on the platform: EURUSD, XAUUSD, US30, NAS100, BTCUSD, USOIL.
- Use British or American English consistently. This document uses **British spelling** for body copy (e.g. programme, licence as a noun) because the likely licensing jurisdictions use it. Change it globally if counsel prefers otherwise.
- Asset classes are capitalised when used as product names: Forex, Metals, Indices, Energies, Crypto, Stocks.

Sitemap & navigation

Thirty-six public pages, grouped in a seven-item mega menu. Every page is at most two clicks from the home page. Every page also has a persistent “Open account” CTA in the header.

External entry points: app.kalks.com/register · app.kalks.com/login · trade.kalks.com · api.kalks.com/docs · status.kalks.com

Locale prefix: /{locale}/... for every non-English locale, e.g. /ar/markets/forex, /es/accounts

Header

- Floating pill header (dark surface #111114 at 80% opacity with backdrop blur, 1px hairline, radius 999, 12px from the top). It sticks on scroll and shrinks from 64px to 56px.
- Left: Kalks white wordmark (links to /). Centre: mega-menu triggers. Right: language selector (flag + code), [Log in](#) → `${APP}/login`, and [Open account](#) → `${APP}/register`.
- Above the header: the global risk-warning bar (A5). It is always visible and not dismissible.
- Mobile (under 1024px): logo, “Open account” pill and a hamburger that opens a full-height sheet with an accordion of the same groups, the language selector at the bottom, and “Log in” as a secondary button.

Mega menu

MENU	COLUMN 1	COLUMN 2	FEATURE TILE (RIGHT)
Markets	Markets overview · Forex · Metals · Indices	Energies · Crypto · Stocks	Live mini-ticker: EURUSD, XAUUSD, NAS100, BTCUSD with bid and change. CTA “See all markets” → /markets

- Below it, the full regulatory and risk disclaimer (A5), set in 12px --text-2 on --bg and never collapsed.

REF A5 GLOBAL ELEMENTS

Global elements

Components that appear on every page, or across many. Build them once in the layout and drive their text from the i18n catalogue.

1. Top risk-warning bar

- Placement: a fixed strip above the header on every page, 32px (desktop) / auto height (mobile), background #111114, 12px text in --text-2, with a 2px ember line at the bottom. It cannot be dismissed. It must not be hidden behind the cookie banner.
- CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. [\[xx\]](#)% of retail investor accounts lose money when trading CFDs with this provider. You should consider whether you understand how CFDs work and whether you can afford to take the high risk

- of losing your money. Read our Risk Disclosure.
- Mobile short version: “CFDs are high-risk. [XX]% of retail accounts lose money. Risk Disclosure”

COMPLIANCE NOTE

The [XX]% figure must be calculated by compliance using the method required by the licensing regulator (commonly the trailing 12-month share of retail accounts that lost money) and updated at the frequency the regulator sets, usually quarterly. Store it in `brand.config.ts` → `riskPercent` with a last-updated date so it is a single change.

2. Footer disclaimer

- Risk warning:** Trading Forex and Contracts for Difference (CFDs) on margin carries a high level of risk and may not be suitable for all investors. Leverage can work against you as well as for you. You could lose more than your initial deposit if negative balance protection does not apply to your account. [XX]% of retail investor accounts lose money when trading CFDs with this provider. Before trading, consider your objectives, level of experience and risk appetite, and seek independent advice if necessary. Past performance is not a reliable indicator of future results.
- Regulatory information:** Kalks is a trading name of [Company legal name], a company registered in [Jurisdiction] under registration number [Company registration no.], with its registered address at [Registered address]. [Company legal name] is authorised and regulated by [Regulator name] under licence number [Licence no.].
- Restricted regions:** The information on this website is not directed at residents of [Restricted countries], or of any country or jurisdiction where its distribution or use would be contrary to local law or regulation. Kalks does not offer its services to residents of these jurisdictions.
- General:** The content of this website is for general information only and does not constitute investment advice, a recommendation or an offer to buy or sell any financial instrument. Crypto CFDs are highly volatile; you do not own the underlying digital asset. Copy trading, PAMM, bonuses, contests and prop challenges are subject to their own terms and risk disclosures.

COMPLIANCE NOTE

The restricted-country list must come from counsel. Typically it includes the United States and sanctioned or FATF high-risk jurisdictions, plus any country where the regulator does not permit the offer. Enforce the same list in the Client Area sign-up (D33); the website only discloses it. If Kalks holds more than one licence, render one paragraph per entity and show the entity that serves the visitor’s country first.

3. Cookie banner

- Bottom-left floating card (max 420px, radius 20, --surface, top-border highlight). It appears on the first visit and stays until the visitor chooses. No analytics or marketing tags fire before consent (Google Consent Mode v2 default = denied).
- We use cookies**
- We use essential cookies to run this website and, with your permission, analytics and marketing cookies to understand how it is used and to measure our campaigns. You can change your choice at any time in Cookie settings.

Accept all → sets all categories = granted

Reject non-essential → only essential

Manage settings → opens preferences panel

CATEGORY	TOGGLE	DESCRIPTION SHOWN IN THE PREFERENCES PANEL
Essential	Always on	Needed for security, load balancing, language choice and remembering your cookie preferences.
Analytics	Off by default	Help us understand which pages are useful so we can improve them. Data is aggregated.
Marketing	Off by default	Measure the performance of our advertising and partner campaigns, including partner referral attribution.

The IB referral parameter (?ref=) is passed to app.kalks.com in the sign-up URL, so attribution does not depend on marketing cookies. See Appendix D8.

4. Trust badges strip

- Placement: home page (section 10), /accounts, /funding and /why-kalks. It is a single row of 5–6 monochrome items (icon plus two lines) on --surface-2, and the icons tint ember on hover. No fake third-party seals, and no regulator logos until the licence is live.

BADGE	LINE 1 (FINAL)	LINE 2 (FINAL)	CONDITION TO SHOW
Shield	Regulated by [Regulator name]	Licence no. [Licence no.]	Only when the licence is granted. Hide the item until then.
Balance	Negative balance protection	Your balance cannot fall below zero	Always
Lock	Email OTP on every withdrawal	Plus new-device login checks	Always
Vault	Own-custody crypto wallets	Majority of funds held in cold storage	Always (D9, D39)
Check	Every withdrawal reviewed	Processed to your own wallet only	Always (D11)
Globe	20+ languages	Support in your language	Always

5. Language selector

- A pill in the header and footer showing a circular flag and the ISO code (e.g. EN). It opens a searchable popover listing languages in their own script (English, العربية, हिन्दी, Español...), grouped by region. The choice is stored in a cookie (essential) and in the URL prefix.
- Proposed launch set (22): English, Arabic, Hindi, Urdu, Bengali, Persian, Turkish, Spanish, Portuguese (Brazil), French, German, Italian, Polish, Russian, Chinese (Simplified), Chinese (Traditional), Japanese, Korean, Vietnamese, Thai, Indonesian, Malay. Confirm the final list with the translation manager (D146).
- RTL: Arabic, Urdu and Persian (and Hebrew if added) set `dir="rtl"` on `<html>`, mirror the layout with logical CSS properties, and keep numbers, prices and symbol names LTR (`<bdi>`).

- Legal documents: if a translation is not yet approved by counsel, show the English version with the note “This document is available in English only. The English version prevails.”
- Auto-detect: suggest (never force) a language from Accept-Language with a dismissible toast: “View this site in Español?” with the buttons “Switch” and “Stay in English”.

6. Sign-up and login entry points

ENTRY POINT	LABEL (FINAL)	TARGET
Header primary	Open account	https://app.kalks.com/register
Header secondary	Log in	https://app.kalks.com/login
Demo CTAs	Try free demo	https://app.kalks.com/register?type=demo
Account-type CTAs	Open Standard / Pro / ECN / Cent	https://app.kalks.com/register?account=standard pro ecn cent
Partner CTAs	Become a partner	https://app.kalks.com/register?intent=partner
Prop CTAs	Start a challenge	https://app.kalks.com/register?intent=prop&plan={planId}
Copy / PAMM CTAs	Start copying / Explore PAMM funds	https://app.kalks.com/register?intent=copy ?intent=pamm
Terminal CTAs	Launch Web Terminal	https://trade.kalks.com

Every outbound link to app.kalks.com must carry the visitor’s locale (?lang=xx), any IB referral code (?ref=CODE, taken from the landing URL and kept for 90 days in first-party storage), and the UTM parameters of the session. See Appendix D8.

7. Other shared components

Live price ticker A horizontally scrolling strip of 12 symbols (bid, 1D change %) fed by the public price WebSocket. The changed digits flash green/red for 400ms. It pauses on hover and falls back to a static snapshot, labelled “Delayed”, if the socket is unavailable.	Final CTA band Used at the bottom of most pages: an ember-glow card with a headline, one line of copy, the primary and secondary CTA and a small risk line. Each page specifies its own copy.	FAQ accordion One item open at a time, with a +/- icon and FAQPage schema. Each page lists its own questions; the full set is in the Help Centre (P33).	Support launcher A round ember button at the bottom right that opens the AI assistant chat (D95/D124). On the website it answers pre-sale questions and hands over to a human with the form “Leave your email and a specialist will reply.”
---	--	--	--

02

Page specifications

Final copy, SEO meta, section-by-section structure, imagery and build notes for every public page of kalks.com.

Home

The home page has one job: persuade a capable trader that Kalks is precise, fair and complete, and get them to open an account or try the demo within 60 seconds. It must also work as a hub for partners, prop traders and copy investors.

URL SLUG	kalks.com/
SEO TITLE	Kalks Trade Forex, Gold, Indices & Crypto CFDs 48/60
META DESCRIPTION	Trade 6 asset classes with raw spreads from 0.0 pips, leverage up to 1:2000 and USDT funding. Open an account from \$10 or try a free demo. 138/155
H1	Precision, in every market.
TEMPLATE	Marketing / long-scroll
STRUCTURED DATA	Organization, WebSite (SearchAction), FinancialService

01Hero

PURPOSE

Communicate the brand promise and the three strongest numbers, then drive the two primary actions.

EYEBROW

FOREX · METALS · INDICES · ENERGIES · CRYPTO · STOCKS

HEADLINE

Precision, in every market.

SUBHEADLINE

Trade global markets with raw spreads from 0.0 pips, leverage up to 1:2000 and USDT funding, all from one account you open in minutes.

BULLETS

- Four account types, from \$10
- Web Terminal with in-house charting
- Negative balance protection on every account

CTAS

Open live account

 → <https://app.kalks.com/register>

Try free demo

 → <https://app.kalks.com/register?type=demo>

MICROCOPY

Takes about 3 minutes. No deposit needed to explore the Client Area.

IMAGERY

Right half: a real, high-resolution screenshot of the Kalks Web Terminal (XAUUSD 15m chart, gold line on a dark chart, order panel open), shown in a floating device frame at a slight 3D tilt. Behind it, a softly blurred night photograph of a financial district skyline (e.g. Canary Wharf or Marina Bay) graded to near-black with an ember tint. The ember glow bleeds from the top edge of the page.

BUILD NOTES

Full-bleed dark section, min-height 88vh. Headline 64/68 desktop, 40/44 mobile, Geist 600, tracking -2%. Text reveal word-by-word (React Bits SplitText, 40ms stagger). The terminal image parallaxes 20px on scroll. The glow breathes at .85↔1 opacity over 8s. CTAs are ember-gradient pills (48px) with a shimmer sweep every 6s. On mobile the image drops below the CTAs and is cropped to the chart.

02Live price ticker

PURPOSE

Prove the platform is live and liquid; a signature brand element.

CONTENT

Symbols in order: EURUSD, GBPUSD, USDJPY, XAUUSD, XAGUSD, US30, NAS100, GER40, USOIL, BTCUSD, ETHUSD, NVDA. Each item shows the circular flag/coin/logo, the symbol, the bid (dimmed last digit) and the 1D change %. Suffix label at the end of the strip: "Indicative prices · Live account quotes may differ".

BUILD NOTES

A continuous marquee directly under the hero (48px tall, --surface-2 top hairline). Subscribe to wss://api.kalks.com/public/quotes for these 12 symbols (throttled to 2 updates/s per symbol on the website). Changed digits flash --up or --down for 400ms. It pauses on hover and clicking a symbol opens its market page anchor. With reduced motion it becomes a static grid of 6 items.

03Headline stats

PURPOSE

Establish credibility with hard product numbers. Company metrics appear only once they are verified.

STATS

IMAGERY

Each card uses the account's photograph from the Client Area mock (Standard: skyline, Pro: London, ECN: New York, Cent: Singapore) as a 30%-opacity background, graded dark.

BUILD NOTES

4 cards; the Pro card is the highlighted (ember→dark gradient + star-particle texture) variant with a gold "Most popular" chip. Pull min deposit, spreads, commission and leverage from /public/account-groups so they never drift from the platform. The hover spotlight follows the cursor.

05 Markets grid

PURPOSE

Show breadth and route to the asset-class pages.

HEADLINE

Six asset classes. One account.

SUBHEADLINE

Trade the world's most active markets as CFDs, going long or short, from the same balance.

CONTENT

TILE	TILE COPY (FINAL)	EXAMPLE SYMBOLS	LINK
Forex	Majors, minors and exotics from 0.0 pips.	EURUSD · GBPUSD · USDJPY	/markets/forex
Metals	Gold and silver against the dollar and euro.	XAUUSD · XAGUSD	/markets/metals
Indices	The US, European and Asian benchmarks.	US30 · NAS100 · GER40	/markets/indices
Energies	Crude oil and natural gas, both directions.	USOIL · UKOIL	/markets/energies
Crypto	Bitcoin, Ethereum and more, 24/7.	BTCUSD · ETHUSD · SOLUSD	/markets/crypto
Stocks	Leading US companies, as CFDs.	AAPL · NVDA · TSLA	/markets/stocks

CTAS

Explore all markets

 → /markets

BUILD NOTES

A 3x2 bento grid. Each tile shows an asset icon (3D glossy style), the title, copy, three live mini-quotes and a 1D sparkline in gold (lightweight-charts area series, no axes). The whole tile is clickable.

06 Platform showcase

PURPOSE

Show the product. The terminal is the strongest differentiator against MT4/MT5 look-alikes.

HEADLINE

A terminal that feels like a trading desk

SUBHEADLINE

Kalks Trader charts, one-click and on-chart trading, a depth-of-market ladder and a built-in risk calculator. In your browser, on any device.

BULLETS

- Drag stop loss, take profit and pending orders directly on the chart
- Multi-chart layouts from 1 to 8 charts, with saved workspaces
- Built-in risk calculator: risk % and stop distance in, lot size out
- Close all, close profitable, close losing, cancel pendings: bulk actions with confirmation
- Price alerts, trade journal and economic calendar inside the terminal

CTAS

Launch Web Terminal

 → https://trade.kalks.com

See all platforms

 → /platforms

IMAGERY

A large, pixel-accurate screenshot of the terminal (4-chart layout: XAUUSD, EURUSD, NAS100, BTCUSD) with the order panel and DOM visible. Add a phone frame overlapping bottom-right showing the mobile PWA layout.

BUILD NOTES

A sticky scroll story on desktop: the screenshot stays pinned while five feature bullets scroll past, and each bullet highlights a region of the screenshot (an ember outline box that animates to the position). On mobile it becomes a simple stacked list with an image.

07 Funding in USDT

PURPOSE

Remove the "how do I pay" objection; explain the crypto-only rail clearly.

HEADLINE

Fund with USDT in three steps

SUBHEADLINE

Deposit USDT on the Tron (TRC20) network to your personal wallet address. Kalks charges no deposit fee.

CONTENT	1. Copy your address. Your Client Area wallet shows a personal USDT-TRC20 address and QR code. 2. Send USDT. Transfer from any exchange or wallet on the TRC20 network. 3. Start trading. Funds are credited after network confirmation, usually within 2–5 minutes. Move them to any trading account instantly.
CTAS	How funding works → /funding
MICROCOPY	Send only USDT on the TRC20 network. Assets sent on another network or in another token may be lost.
BUILD NOTES	3 numbered step cards joined by a dotted ember line that draws in on scroll. Show the USDT (green) and Tron (red) official logos.

08 Grow beyond trading	
PURPOSE	Cross-sell the four growth products to different visitor intents.
HEADLINE	More ways to take part in the markets
CONTENT	Copy trading Follow strategy providers and mirror their trades automatically, with your own risk limits. Explore copy trading → /copy-t PAMM Invest in managed funds run by approved money managers. Fees are charged only above a high-water mark. Explore PAMM → /pamm Prop challenges Prove your skill on a simulated account and earn up to 80% of simulated profits. See challenge plans → /prop Partners Refer traders and earn multi-tier commissions paid to your Kalks wallet. Become a partner → /partners
RISK NOTE	Copy trading, PAMM and prop challenges involve risk. Past performance is not a reliable indicator of future results. Prop funded accounts are simulated.
IMAGERY	Each card carries a 3D glossy accent: copy (two linked gold nodes), PAMM (gold coin stack), prop (trophy), partners (network of gold dots).
BUILD NOTES	4-up card row with the spotlight hover. The risk line sits directly under the cards at body size, not in a tooltip.

09 Tools, news and academy	
PURPOSE	Give non-ready visitors a reason to stay and return (SEO and retargeting).
HEADLINE	Prepare before you trade
SUBHEADLINE	Free tools, a daily AI market brief and a structured academy, available to everyone.
CONTENT	Economic calendar Every release that moves markets, filtered by impact and currency. Open calendar → /tools/econor Trading calculators Position size, pip value, margin, swap and profit, before you place the order. Use calculators → /tools/calcul Daily market brief A short AI-assisted summary of the day's news and calendar, reviewed each morning. Read today's brief → /tools/ma Kalks Academy Courses from first trade to strategy automation, with quizzes and demo challenges. Start learning → /academy
BUILD NOTES	Show the next 3 high-impact calendar events live (red impact bar, time in visitor's local time, currency pill) inside the calendar card.

10 Safety and trust	
PURPOSE	Answer "is my money safe?" with verifiable mechanisms, not claims.
HEADLINE	Built to protect your account
SUBHEADLINE	Clear rules, strict controls and full transparency. Here is how we look after your funds and your data.
BULLETS	- Negative balance protection: your account balance cannot go below zero - Own-custody wallets with the majority of client crypto held in cold storage - Email one-time passcodes for withdrawals, new devices and credential changes - Every withdrawal reviewed and paid only to your own wallet - Daily reconciliation between the blockchain, your wallet and your trading accounts [[Regulator name]] licence [[Licence no.]] (show once granted)
CTAS	How we protect you → /why-kalks
BUILD NOTES	Left: copy and bullets. Right: a 3D glossy shield illustration on a glowing ember ring (gauge component, static). Below: the Trust badges strip (A5-4).

11 How to start	
PURPOSE	Reduce perceived effort.
HEADLINE	Start trading in minutes

CONTENT	1. Register. Email, phone and a password. Verify with a one-time code. 2. Fund your wallet. Deposit USDT-TRC20 and move it to a trading account. Identity verification is needed only before your first withdrawal. 3. Trade. Open the Web Terminal, or start with a free demo account.
CTAS	Open live account → https://app.kalks.com/register Try free demo → https://app.kalks.com/register?type=demo
BUILD NOTES	Horizontal 3-step timeline with numbered ember rings. No testimonials section: add one only when genuine, consented and verifiable reviews exist (compliance sign-off required).

12 FAQ teaser	
PURPOSE	Handle the top objections and earn FAQ rich results.
HEADLINE	Questions, answered
CONTENT	Q What is the minimum deposit? You can open a Standard or Cent account from \$10. Pro starts from \$200 and ECN from \$500. Q How do I deposit and withdraw? Kalks uses USDT on the Tron (TRC20) network. Deposits are credited after network confirmation. Withdrawals are reviewed and sent to your own USDT-TRC20 address. Q Do I need to verify my identity? You can register, deposit and trade straight away. Identity verification (KYC) is required before your first withdrawal. Q Can I practise first? Yes. Demo accounts are free, use virtual funds and last 10 days. You can refill the balance from the Client Area. Q Can I lose more than I deposit? No. Negative balance protection resets a negative balance to zero, so you cannot lose more than the funds in your account.
CTAS	Visit the Help Centre → /help

13 Final CTA band	
HEADLINE	Ready when the market is.
SUBHEADLINE	Open an account in minutes, or practise risk-free with virtual funds on a demo.
CTAS	Open live account → https://app.kalks.com/register Try free demo → https://app.kalks.com/register?type=demo
MICROCOPY	CFDs are high-risk. [XX]% of retail investor accounts lose money when trading CFDs with this provider.
BUILD NOTES	Highlighted card (ember→dark gradient, star-particle texture drifting slowly), centred, max-width 960.

Markets overview

A hub that explains what can be traded, how CFDs work at Kalks, and routes the visitor to each asset class.

URL SLUG	kalks.com/markets
SEO TITLE	Markets Forex, Metals, Indices, Crypto & Stock CFDs 53/60
META DESCRIPTION	Trade Forex, Metals, Indices, Energies, Crypto and Stock CFDs from one Kalks account. Go long or short with tight spreads and flexible leverage. 144/155
H1	Trade the world's markets from one account
TEMPLATE	Hub
STRUCTURED DATA	BreadcrumbList, ItemList (asset classes)

01 Hero	
HEADLINE	Trade the world's markets from one account
SUBHEADLINE	Six asset classes and [Number of instruments] instruments, all traded as CFDs from the same balance. Go long when you expect a rise and short when you expect a fall.
CTAS	Open live account → https://app.kalks.com/register Try free demo → https://app.kalks.com/register?type=demo
IMAGERY	Abstract, cinematic: a world map of dotted gold points on black, with glowing ember nodes on the trading-session cities (Sydney, Tokyo, London, New York).

BUILD NOTES

Session overlay: highlight the currently open sessions with a live countdown to the next open/close (server time GMT+2/+3, shown in the visitor's local time).

02Market watch table

PURPOSE

A live, filterable snapshot that doubles as SEO content.

HEADLINE

Live market watch

SUBHEADLINE

Indicative prices across our most-traded instruments.

CONTENT

Tabs: All · Forex · Metals · Indices · Energies · Crypto · Stocks. Columns: Instrument (icon + symbol + name) · Bid · Ask · Spread · 1D change · Sparkline · Trade button.

CTAS

[Trade](#) → <https://trade.kalks.com?symbol={SYMBOL}>

BUILD NOTES

TanStack Table with 20 rows per tab and a live WebSocket feed; the price digits flash on change. The “Trade” button deep-links to the terminal (a logged-out user is redirected to login first, then returns). Server-render a snapshot for SEO, then hydrate live. Label: “Indicative prices. Live account quotes may differ.”

03Asset class cards

HEADLINE

Choose your market

CONTENT

ASSET CLASS	CARD COPY (FINAL)	HOURS (SERVER TIME)	MAX LEVERAGE
Forex	The largest market in the world. Trade major, minor and exotic currency pairs around the clock, five days a week.	24/5	up to 1:2000 (Cent)
Metals	Gold and silver: traditional safe havens that react to rates, inflation and risk sentiment.	24/5 with a daily break	up to 1:500
Indices	One position on a whole economy's leading companies: US, European and Asian benchmarks.	Nearly 24/5, by exchange	up to 1:200
Energies	Crude oil and natural gas: markets driven by supply, geopolitics and the business cycle.	24/5 with a daily break	up to 1:100
Crypto	Bitcoin, Ethereum and leading altcoins as CFDs: long or short, including weekends.	24/7	up to 1:100
Stocks	Shares of leading US companies as CFDs, with dividend adjustments.	US session	up to 1:20

BUILD NOTES

6 cards linking to /markets/{class}. Each shows an icon cluster (flags, coins, logos) and a mini table of 3 live quotes.

04What is a CFD

PURPOSE

Mandatory education plus SEO.

HEADLINE

How CFD trading works

BODY COPY

A Contract for Difference (CFD) is an agreement to exchange the difference in an instrument's price between the time you open a position and the time you close it. You never own the underlying asset. You trade its price movement.

If you buy (go long) and the price rises, you make a profit; if it falls, you make a loss. If you sell (go short), the opposite applies. Leverage means you only need a fraction of the position's value as margin, but profits and losses are calculated on the full position size.

CONTENT

Example. You buy 1 lot of XAUUSD (100 oz) at 2,654.30 with 1:500 leverage. The required margin is about \$530.86. If gold rises to 2,664.30, your profit is \$1,000 before costs. If it falls to 2,644.30, your loss is \$1,000. Moves in either direction are magnified by position size.

RISK NOTE

Leverage magnifies both gains and losses. Only trade with money you can afford to lose.

BUILD NOTES

An interactive toggle, Buy/Sell and price up/down, animates a small P&L number. Keep the example figures exact; they are computed with contract size 100 oz and 1:500 leverage.

05Why trade with Kalks

BULLETS

- Raw spreads from 0.0 pips on ECN; all-in spreads from 0.3 pips on Pro
- Hedging or netting position mode on every account
- Swap-free (Islamic) option on eligible accounts
- Transparent contract specifications and trading hours for every symbol
- Negative balance protection

REF P03

PAGE SPECIFICATION · MARKETS

Forex

Forex is the flagship market and the likely entry page from paid search. It must be precise about spreads, leverage and hours.

URL SLUG	kalks.com/markets/forex
SEO TITLE	Forex Trading Majors, Minors & Exotics Kalks 48/60
META DESCRIPTION	Trade major, minor and exotic currency pairs with spreads from 0.0 pips on ECN and leverage up to 1:2000 on Cent. Swap-free option available. 141/155
H1	Trade Forex with raw spreads from 0.0 pips
TEMPLATE	Asset class (shared template)
STRUCTURED DATA	BreadcrumbList, FAQPage, Product (per instrument, optional)

01Hero

EYEBROW | MARKETS · FOREX

HEADLINE | Trade Forex with raw spreads from 0.0 pips

SUBHEADLINE | Trade majors, minors and exotics 24 hours a day, five days a week, with fast execution, hedging or netting, and leverage up to 1:2000 on Cent accounts.

CTAS

Open live account → <https://app.kalks.com/register>

Try free demo → <https://app.kalks.com/register?type=demo>

IMAGERY | Featured symbol EURUSD. Background photograph: a currency trading floor at night, screens blurred, graded to ink with an ember rim light. Circular EU/US flag pair avatar next to the price box.

BUILD NOTES | The shared asset-class hero: headline left, a live chart right (lightweight-charts, 1D, gold line over a dotted grid, with a range pill group 1D 1W 1M 3M YTD 1Y) for the featured symbol, and a live bid/ask box with a large price and the last digits emphasised.

02Why trade forex with Kalks

BULLETS

- Spreads from 0.0 pips on ECN, or all-in from 0.3 pips on Pro
- Leverage up to 1:1000 on Standard and 1:2000 on Cent, chosen when you open the account
- Micro lots from 0.01 so you can size positions precisely
- Hedging mode for opposite positions, or netting for a single net position per symbol
- Swap-free option for clients who cannot pay or receive overnight interest
- Trailing stops, OCO brackets and one-click trading in the Web Terminal

03Instrument table

PURPOSE | Transparent, scannable conditions. This is the main SEO body of the page.

HEADLINE | Forex instruments and conditions

SUBHEADLINE | Typical spreads during liquid market hours. Spreads are variable and can widen around news, rollover and low liquidity.

CONTENT

SYMBOL	INSTRUMENT	STANDARD (PIPS)	PRO (PIPS)	ECN RAW (PIPS)	MAX LEVERAGE	HOURS (SERVER)

[Number of FX pairs] pairs available in total; the table shows the most traded. ECN adds \$3.50 commission per lot per side. The effective leverage on each position is the lower of your account leverage and the instrument maximum. Leverage may be reduced around weekends, holidays and major news (dynamic margin). Server time is GMT+2/+3.

BUILD NOTES Render from /public/symbols?class=... (typical spread = 24h median per group, computed by the pricing service). Show a search box and a “Full specifications” drawer per row (contract size, digits, min/max/step lot, margin %, swap long/short, triple-swap day, sessions). Server time GMT+2 (winter) / GMT+3 (summer, US DST). Offer a “Show in my time” toggle.

04 FAQ

CONTENT

Q What is a pip?

For most pairs a pip is the fourth decimal place (0.0001). For JPY pairs it is the second (0.01). On a 1-lot EURUSD position one pip is worth \$10.

Q When is the forex market open?

From Monday 00:05 to Friday 23:55 server time (GMT+2/+3), continuously. Liquidity is highest when the London and New York sessions overlap.

Q What is the minimum trade size?

0.01 lots (1,000 units of the base currency) on all account types. On Cent accounts, balances are shown in US cents, so small positions are easy to manage.

Q Do you charge swaps on forex?

Positions held past the daily rollover at 00:00 server time are charged or credited a swap. Wednesday carries a triple swap for the weekend. Swap-free accounts are available on request.

05 Final CTA

HEADLINE

Trade forex with precision

Server time GMT+2 (winter) / GMT+3 (summer, US DST). Offer a “Show in my time” toggle.

04FAQ

CONTENT

Q

How much is one pip on gold?

On XAUUSD one point (0.01) on 1 lot (100 oz) is worth \$1, and a \$1 move in the gold price is worth \$100 per lot.

- Q How much margin do I need for 1 lot of gold?

Margin = price × 100 oz ÷ leverage. At 2,654.30 and 1:500, that is about \$530.86. At 1:100 it is about \$2,654.30.
- Q Why does gold have a daily break?

The underlying market pauses briefly each day around the rollover. No new orders can be placed during the break; existing stop and limit orders stay active.

Server time GMT+2 (winter) / GMT+3 (summer, US DST). Offer a “Show in my time” toggle.

04

FAQ

CONTENT

Q Are indices cash or futures based?

Most of our indices are cash-based and have no expiry. Where an index is priced from futures, it rolls over on a published date and we apply an adjustment, so your P&L is not affected by the price gap between contracts.

Q Do dividends affect my index position?

Yes. On ex-dividend dates of index constituents, a dividend adjustment is credited to long positions and debited from short positions on cash indices.

Q What moves index prices?

Earnings of the largest constituents, interest-rate expectations, economic data and overall risk sentiment.

04 FAQ

CONTENT

Q What is the difference between WTI and Brent?

WTI (USOIL) is the US benchmark, priced at Cushing, Oklahoma. Brent (UKOIL) is the international benchmark from the North Sea. They usually move together but can diverge on regional supply.

Q Why does oil rollover matter?

Oil CFDs are priced from futures that expire monthly. On the rollover date we move to the next contract and apply a price adjustment, so the change of contract does not create an artificial profit or loss.

Q What events move oil prices?

Weekly US inventory reports, OPEC+ decisions, geopolitical events and global growth data.

04FAQ

CONTENT

Q Do I own the cryptocurrency?

No. You trade a CFD on its price. You do not own, hold or receive the coin, and you cannot transfer it to a wallet.

- Q

Can I trade crypto at the weekend?

Yes. Crypto CFDs trade 24/7. Other markets close from Friday night to Sunday night.
- Q

Why is leverage lower on crypto?

Crypto prices are far more volatile than major currencies, so lower leverage keeps margin requirements aligned with the risk.

HEADLINE

Dividends and splits, handled for you

BODY COPY

When a company pays a dividend, we credit long positions and debit short positions with the dividend amount on the ex-dividend date. When a stock splits, we adjust your position size and open price so the value of your position is unchanged.

BUILD NOTES

A small illustrated two-panel card: “Before split: 1 × \$1,000” → “After 10:1 split: 10 × \$100”.

05 FAQ

CONTENT

Q Do I get voting rights or own the shares?

No. A stock CFD tracks the share price. You do not own the share and have no voting rights.

Q Can I trade stocks outside US market hours?

No. Stock CFDs trade only during the US cash session, 16:30–23:00 server time. Orders can be placed while the market is closed and are processed at the open, subject to gaps.

Q What happens at earnings?

Share prices can gap sharply after earnings, which are usually released outside market hours. Stop orders may be filled at a worse price than requested.

Leverage is fixed per account and chosen at opening. It can be changed later from the Client Area when the account has no open positions. The effective leverage on a position is the lower of the account leverage and the instrument’s maximum.

BUILD NOTES Sticky header row with the account names and a mini CTA per column. On mobile, a horizontally scrollable table with the first column frozen, plus a “Compare two” picker.

04 Hedging vs netting

HEADLINE Hedging or netting: you choose

BODY COPY **Hedging** lets you hold several positions on the same symbol, including buys and sells at the same time. Each position has its own stop loss and take profit, and you can close one against another with Close By.

Netting keeps one net position per symbol. A new order in the same direction adds to it; an opposite order reduces, closes or reverses it. For example, if you are long 1 lot and sell 3 lots, you become short 2 lots.

BUILD NOTES Two side-by-side animated diagrams showing position stacks (hedging: separate rows; netting: a single bar that shrinks, then flips).

05 Swap-free (Islamic) accounts

HEADLINE Swap-free accounts

BODY COPY Clients who cannot pay or receive interest for religious reasons can request a swap-free version of any account type. No overnight swap is charged or paid. On some instruments held for more than **[[Islamic fee-free nights]]** nights, a fixed administration fee applies instead. This fee is not interest and is disclosed in the symbol specifications before you trade.

CTAS [Request swap-free status](#) → <https://app.kalks.com/accounts?swapFree=request>

MICROCOPY Swap-free status is subject to approval and may be withdrawn if it is used to profit from the absence of swaps.

06 Demo accounts

HEADLINE Practise on any account type

BODY COPY Every account type is available as a free demo with virtual funds. Demo accounts last 10 days and can be refilled with one click from the Client Area. When your strategy is ready, open the live version in seconds.

CTAS [Try free demo](#) → <https://app.kalks.com/register?type=demo> [About demo accounts](#) → </accounts/demo>

07 FAQ

CONTENT

Q Can I open more than one account?
Yes. You can hold several live and demo accounts of different types in one Client Area, up to the limit shown in your Client Area, and move funds between them through your wallet.

Q Can I change my account type later?
Account type is fixed once opened. Open a new account of the type you want and transfer funds between them instantly.

- Q

Which account has the lowest trading cost?

It depends on your style. For frequent, short-term trading, ECN is usually the cheapest overall: raw spread plus commission. For occasional trading, Standard or Pro keeps costs simple.
- Q

What does USC mean on a Cent account?

US cents. A deposit of \$10 shows as 1,000 USC. Profits and losses are also shown in cents, while lot sizes work exactly as on a standard account.

02

How it works

CONTENT	FEATURE	DETAIL (FINAL COPY)
	Virtual balance	Choose a starting balance from \$1,000 to \$100,000 in virtual funds.
	Account types	Standard, Pro, ECN or Cent, with hedging or netting, exactly as in live trading.
	Prices	Real-time market prices from the same feed as live accounts.
	Duration	Each demo account is active for 10 days. You can open a new one at any time.
	Refill	Top your balance back up with the Refill button in the Client Area, up to 3 times per day.
	Tools	Full Web Terminal, Strategy Builder backtests, API sandbox and academy demo challenges.

03

Demo vs live

BODY COPY

A demo account is the best way to learn the platform, but it cannot reproduce everything about live trading. Execution on a demo account is simulated, so fills and slippage may differ from live conditions, and trading with virtual money feels different emotionally. Treat demo results as practice, not as a prediction of live results.

04

FAQ

CONTENT

Q

Is the demo account really free?

Yes. No deposit and no payment details are needed.

- Q What happens when my demo expires?

The account becomes read-only and is then archived. Your trade history remains visible in the Client Area, and you can open a new demo straight away.
- Q Can I withdraw demo profits?

No. Demo funds are virtual and have no cash value.

05 Final CTA

REF P11

PAGE SPECIFICATION

Trading conditions

The reference page for costs and rules. It needs dense, factual content with anchored sections (#spreads, #commissions, #leverage, #margin, #swaps, #hours, #execution) that the mega menu and other pages deep-link to.

URL SLUG	kalks.com/trading/conditions
SEO TITLE	Trading Conditions Spreads, Leverage, Swaps Kalks 53/60
META DESCRIPTION	Kalks trading conditions in full: spreads and commissions, leverage and margin, stop-out, swaps and swap-free, trading hours and order execution. 145/155
H1	Trading conditions, in full
TEMPLATE	Long-form reference with sticky in-page nav
STRUCTURED DATA	BreadcrumbList, FAQPage

01 Hero + in-page nav

HEADLINE

Trading conditions, in full

SUBHEADLINE

Everything that affects the cost and handling of your trades, in one place. No small print elsewhere.

BUILD NOTES

A sticky left sub-nav (desktop) or horizontal chips (mobile) with the anchors: Spreads · Commissions · Leverage · Margin & stop-out · Swaps · Swap-free · Trading hours · Execution · Negative balance protection. Scroll-spy highlights the active chip.

02 Spreads #spreads

HEADLINE

Spreads

BODY COPY

The spread is the difference between the buy (ask) and sell (bid) price and is the main cost of trading on Standard, Pro and Cent accounts. Kalks spreads are variable: they follow market liquidity and are usually tightest when the major sessions overlap. They can widen around major news, at the daily rollover and when markets are thin.

The typical spreads we publish are median values during liquid hours. Live spreads are always shown in the Web Terminal before you trade.

CONTENT

Typical spreads (forex in pips, others in price units)

SYMBOL	STANDARD	PRO	ECN (RAW)	CENT
EURUSD	1.2	0.5	0.1	1.2
GBPUSD	1.5	0.7	0.2	1.5
XAUUSD	0.30	0.20	0.08	0.30
NAS100	1.5	1.2	0.8	1.5
BTCUSD	25.00	18.00	12.00	25.00

03 Commissions #commissions

HEADLINE

Commissions

BODY COPY

Standard, Pro and Cent accounts have no commission: the cost is built into the spread. ECN accounts pay raw spreads plus a commission of \$3.50 per standard lot per side (\$7.00 per round turn) on Forex and Metals. Commissions for other asset classes on ECN are shown in the symbol specifications.

CONTENT

Example: 2 lots EURUSD on ECN = \$3.50 × 2 to open + \$3.50 × 2 to close = \$14.00 in commission, plus the raw spread.

04 Leverage #leverage

HEADLINE

Leverage

BODY COPY

Leverage lets you open a position larger than your margin. You choose the account leverage when you open the account, from the options for that account type. The effective leverage for each position is the lower of the account leverage and the instrument's maximum (for example, 1:20 for stock CFDs).

To manage risk around market closures, Kalks may temporarily reduce the leverage available on new positions before weekends and holidays and around major scheduled news. These periods are announced in the Client Area in advance whenever possible. You can change your account leverage in the Client Area when the account has no open positions.

CONTENT

ASSET CLASS	MAX INSTRUMENT LEVERAGE
Forex majors	up to account maximum (1:2000 Cent)
Forex minors / exotics	1:500 / 1:100
Metals	1:500 gold · 1:200 silver
Indices	1:200 majors · 1:100 others
Energies	1:100 oil · 1:50 gas
Crypto	1:100 BTC/ETH · 1:50 others
Stocks	1:20

RISK NOTE

Higher leverage increases both potential profit and potential loss. Choose leverage you can manage.

05 Margin, margin call and stop-out #margin

HEADLINE

Margin and stop-out

BODY COPY

Margin is the amount set aside to keep a position open: $\text{Margin} = (\text{Lots} \times \text{Contract size} \times \text{Price}) \div \text{Leverage}$. **Margin level** = $\text{Equity} \div \text{Used margin} \times 100\%$.

If your margin level falls to the **margin call** level, we notify you by email and in-app so you can add funds or reduce positions. If it falls to the **stop-out** level, the system automatically starts closing positions, beginning with the largest losing position, until the margin level is restored above the stop-out level.

CONTENT

ACCOUNT	MARGIN CALL	STOP-OUT
Standard	100%	50%
Pro	100%	50%
ECN	100%	50%
Cent	60%	20%

Hedged positions: when you hold opposite positions on the same symbol in hedging mode, margin is charged on the hedged volume at a reduced rate of **[Hedged margin %]** of the normal requirement.

BUILD NOTES

Include an inline margin calculator widget (the same component as /tools/calculators) prefilled with XAUUSD 1 lot at 1:500.

06 Swaps #swaps

HEADLINE

Swaps (overnight financing)

BODY COPY

A swap is an interest adjustment charged or credited on positions held open past the daily rollover at 00:00 server time. It reflects the interest-rate difference between the two currencies (or the financing cost of the instrument) plus a Kalks fee. Swap rates are set per symbol, separately for long and short positions, and are shown in the symbol specifications in the Web Terminal.

On Wednesday night a triple swap is applied to Forex and Metals to cover the weekend. For Indices and Energies the triple-swap day may differ (usually Friday). Crypto CFDs are charged a swap every day, including weekends.

07 Swap-free #swap-free

HEADLINE

Swap-free (Islamic) option

BODY COPY

Swap-free status is available on all account types for clients who cannot pay or receive interest for religious reasons. No swap is charged or credited. For some instruments, a fixed administration fee may apply once a position has been held for more than **[Islamic fee-free nights]** nights; the fee is displayed in the symbol specifications. Kalks may review or revoke swap-free status if it is used for carry-trade or arbitrage purposes.

08 Trading hours #hours

HEADLINE

Trading hours

BODY COPY

All times are server time: GMT+2 in winter and GMT+3 when US daylight saving time is in effect. This keeps the daily rollover aligned with the New York close. Exact sessions and holiday schedules for every symbol are in the Web Terminal and are announced in the Client Area before each holiday.

CONTENT

ASSET CLASS	TRADING HOURS (SERVER TIME)
Forex	Monday 00:05 – Friday 23:55
Metals	Monday 01:01 – Friday 23:58, daily break 23:59–01:01
Indices	By index; US indices Monday–Friday 01:05–23:59 with a daily break
Energies	Monday–Friday 01:05–23:55, daily break
Crypto	24/7, except scheduled maintenance
Stocks	Monday–Friday 16:30–23:00 (US cash session)

BUILD NOTES

A “Markets open now” widget: a 24h horizontal timeline per asset class with a moving “now” marker and the next holiday closure.

09 Execution #execution

HEADLINE

Order execution

BODY COPY

All accounts use market execution: your order is filled at the best available price when it reaches our servers. You can set a maximum deviation (slippage tolerance) in the order ticket. If the price moves beyond it before execution, the order is not filled and you are shown the new price.

Slippage can be positive or negative, and it is applied symmetrically. Stop orders become market orders when triggered and may be filled at a worse price during gaps or fast markets. Limit orders are filled at your price or better.

Kalks acts as the counterparty to your trades. [[Execution model disclosure]]. Full details are in our Order Execution Policy.

CONTENT

ORDER TYPES	EXPIRY OPTIONS	ALSO SUPPORTED
Market, Limit, Stop, Stop-Limit	Good-till-cancelled, Today, Specific date	Server-side trailing stop, partial close, Close By (hedging), OCO brackets, one-click trading

10 Negative balance protection #nbp

HEADLINE

Negative balance protection

BODY COPY

If a sharp market move takes your account balance below zero, Kalks resets it to zero at no cost to you. You can never lose more than the funds in your trading account. Negative balance protection applies per trading account and does not apply to losses offset against other accounts or to accounts involved in abuse of this protection.

11 Final CTA

HEADLINE

Clear conditions. Your move.

SUBHEADLINE

Professional charting and fast execution in any modern browser. No download, no plug-ins, with the same workspace on every device.

CTAS

Launch Web Terminal

 → <https://trade.kalks.com>

Try free demo

 → <https://app.kalks.com/register?type=demo>

IMAGERY

Full-width terminal screenshot at 2× resolution. A short, muted, looping MP4/WebM (8–12s) plays: dragging a take-profit line on XAUUSD, the live P&L label updating, and closing with the × on the entry line.

kalks.com

Page 31 of 70

BUILD NOTES

Lazy-load the video with a poster frame; under reduced motion, show the poster only. Charts are Kalks' own in-house charting, fed by the Kalks market-data service; no third-party chart licence or credit line is needed.

02

Feature blocks

CONTENT	FEATURE	HEADLINE (FINAL)	COPY (FINAL)
	Charts	Kalks Trader charts, built in	Over 100 indicators, drawing tools and timeframes from 1 minute to 1 month. Save up to 8 charts per layout and switch workspaces in one click.
	On-chart trading	Trade where you analyse	Place orders at a price with a right-click, drag stop loss, take profit and pending orders on the chart, and close with the x on the entry line. Live P&L sits right on your position.
	Depth of market	See the ladder	A depth-of-market ladder with one-click trading at any price level.
	Risk calculator	Size every trade correctly	Enter your risk as a percentage or an amount and your stop distance, and the ticket calculates the lot size, margin, pip value and potential profit or loss.
	Bulk actions	Stay in control in fast markets	Close all, close profitable, close losing or cancel all pending orders, each with a confirmation step.
	Orders	Every order you need	Market, Limit, Stop, Stop-Limit, server-side trailing stops, OCO brackets, partial close and Close By.
	Alerts & journal	Never miss a level	Price and indicator alerts by email and in-app, plus a trade journal with notes, tags and screenshots.
	News & calendar	Context without switching tabs	Market news tagged by symbol and an economic calendar inside the terminal.
	Multi-account	All your accounts, one screen	Switch between live and demo accounts from the header, or keep several open in different tabs.
	Execution feedback	Know what happened	Sound and on-screen confirmations for fills, stop loss and take profit hits and margin calls, plus your own maximum slippage setting.
	Themes	Built for long sessions	Dark and light themes, dockable panels and a layout for every screen size.

BUILD NOTES

Alternating image/text rows (zig-zag). Each row gets a cropped screenshot or short loop. The rows fade and rise in with a 50ms stagger.

03

Requirements

BODY COPY

Works in current versions of Chrome, Edge, Safari and Firefox on Windows, macOS, Linux, iOS and Android. A stable internet connection is recommended. Prices stream over a secure WebSocket connection.

04

Investor (view-only) access

BODY COPY

Share read-only access to any trading account with its investor password. Viewers can see positions and history in the full terminal, but cannot trade, transfer or change settings.

05

Final CTA

HEADLINE

Open the terminal. Feel the difference.

CTAS

Launch Web Terminal

 → <https://trade.kalks.com>

Open live account

 → <https://app.kalks.com/register>

Mobile app

At launch the mobile experience is an installable Progressive Web App (PWA). Native iOS and Android apps follow in phase 2. The page must be honest about this and make installation effortless.

URL SLUG	kalks.com/platforms/mobile
SEO TITLE	Kalks Mobile App Trade on iOS & Android 41/60
META DESCRIPTION	Install the Kalks app on iOS or Android straight from your browser. Full charts, one-tap trading, wallet and alerts: your whole account in your pocket. 151/155
H1	Your whole account, in your pocket
TEMPLATE	Product feature page
STRUCTURED DATA	SoftwareApplication (operatingSystem iOS, Android, Web)

01Hero

HEADLINE

Your whole account, in your pocket

SUBHEADLINE

Trade, fund your wallet and follow your positions from your phone. Install the Kalks app directly from your browser. No app store needed.

CTAS

Install the app

 → triggers PWA install prompt (Android/desktop) or opens iOS instructions

Open on this device

 → https://trade.kalks.com

IMAGERY

Two real phone mockups (iPhone and a Pixel), showing the mobile terminal (XAUUSD chart with a buy/sell bar) and the Client Area wallet (USDT balance with QR). Dark background with an ember glow behind the phones.

BUILD NOTES

Detect the platform: on Android/Chrome/Edge, use beforeinstallprompt to show the native prompt; on iOS Safari, open a sheet with the steps below; on desktop, show a QR code that opens this page on the phone.

02Install steps

CONTENT

iPhone and iPad (Safari)

1. Open kalks.com in Safari.

2. Tap the Share icon.

3. Choose “Add to Home Screen”, then “Add”.

Android (Chrome)

1. Open kalks.com in Chrome.

2. Tap “Install app” when prompted, or open the : menu.

3. Choose “Install app” and confirm.

03Features

BULLETS

- Full Kalks Trader charts in a mobile layout
- One-tap buy and sell, with stop loss and take profit
- Deposit and withdraw USDT-TRC20 with QR codes
- Real-time notifications for fills, margin calls and deposits
- Copy trading, PAMM and prop dashboards
- 20+ languages, dark and light themes

04Native apps note

BODY COPY

Native Kalks apps for the App Store and Google Play are in development. Your login, accounts and settings will carry over automatically.

BUILD NOTES

Show App Store / Google Play badges only once the apps are live. Until then, show a “Notify me” email capture that posts to the marketing list (with consent checkbox).

API & FIX

For developers, algo firms and institutions. Tone: technical and exact. Show code, protocols, limits and security, and link to the docs portal.

URL SLUG	kalks.com/platforms/api
SEO TITLE	Trading API REST, WebSocket & FIX 4.4 Kalks 47/60
META DESCRIPTION	Connect to Kalks with REST, WebSocket and FIX 4.4. Python and JavaScript SDKs, webhook signals, scoped API keys and a free demo sandbox. 136/155

01Hero

HEADLINE

Build on Kalks: REST, WebSocket and FIX

SUBHEADLINE

Stream prices, manage orders and read account data programmatically. Start in the sandbox on a demo account and switch to live with one key.

CODE SAMPLE

```
from kalks import Client

client = Client(api_key="KX_live_...", account="80412337")
client.orders.create(symbol="XAUUSD", side="buy", volume=0.50,
                    sl=2628.00, tp=2680.00)
for tick in client.stream.quotes(["XAUUSD", "EURUSD"]):
    print(tick.symbol, tick.bid, tick.ask)
```

CTAS

Read the API docs

 → <https://api.kalks.com/docs>

Create an API key

 → <https://app.kalks.com/api/keys>

IMAGERY

A code-first hero: a dark code window with a Python snippet (below), syntax-highlighted in ember/gold/neutral, next to a live-updating JSON tick stream.

BUILD NOTES

Code tabs: Python · JavaScript · cURL · FIX. The code must match the real SDK once published; keep the snippets in the docs repo and import them at build time.

02Protocols

CONTENT	INTERFACE	USE IT FOR	DETAILS
	REST API	Accounts, orders, positions, history	JSON over HTTPS, OpenAPI specification, idempotency keys on order endpoints.
	WebSocket	Real-time prices and account events	Binary or JSON streams, subscribed symbols only, fills and margin events pushed in real time.
	FIX 4.4	Institutional order routing	Order entry and market data sessions, for clients with an existing FIX engine. Available on request.
	Webhooks (signals in)	Automate TradingView-style alerts	Send a signed alert to your personal webhook URL. One signal can fan out to several of your accounts, each with its own sizing rule.
	SDKs	Faster integration	Official Python and JavaScript/TypeScript SDKs.

03Security and control

BULLETS

- API keys are created per trading account, with scopes: read-only or trade. Keys can never withdraw funds.
- IP allow-list and expiry date per key
- Per-key rate limits, shown in the docs and in response headers
- Kill switch: disable any key instantly and optionally close the positions it opened
- Every order is tagged with its source (manual, API, FIX, webhook, strategy, copy, PAMM) in your history and statements

04Sandbox

BODY COPY

Every API feature works against demo accounts, with the same endpoints and real-time prices. Build and test for free, then point your key at a live account.

05

Institutional & FIX enquiries

BODY COPY

Need FIX connectivity, custom limits or a dedicated session? Tell us about your setup and our team will get back to you.

CTAS

Contact the API team

→ /contact?topic=api

RISK NOTE

Automated trading can amplify losses through errors, connectivity issues or unexpected market conditions. You remain responsible for all orders sent with your API keys.

REF P16

PAGE SPECIFICATION · PLATFORMS

Strategy Builder

Automation for non-developers and developers alike: a visual builder, a code editor, an AI assistant, backtests and 24/7 deployment. Be careful with performance claims.

URL SLUG	kalks.com/platforms/strategy-builder
SEO TITLE	Strategy Builder Build, Backtest & Automate Kalks53/60
META DESCRIPTION	Build trading strategies visually or in code, describe rules in plain language with the AI assistant, backtest on years of data and run them 24/7.146/155
H1	Turn your trading rules into a running strategy
TEMPLATE	Product feature page
STRUCTURED DATA	SoftwareApplication

01

Hero

HEADLINE

Turn your trading rules into a running strategy

SUBHEADLINE

Build with blocks or code, test on years of market history and deploy to a demo or live account that runs 24/7 on Kalks servers. No VPS needed.

CTAS

Open Strategy Builder

→ https://app.kalks.com/algo/builder

Try on demo

→ https://app.kalks.com/register?type=demo&intent=algo

IMAGERY

A split screen: the left half shows the visual builder (blocks: “When RSI(14) < 30” → “Buy 0.10 lot” → “SL 20 pips”); the right half shows the backtest equity curve in gold over a dotted grid with a drawdown shading.

02

Four steps

CONTENT

STEP	HEADLINE (FINAL)	COPY (FINAL)
1 · Build	Blocks or code: your choice	Drag and connect conditions and actions in the visual builder, or write in our Python-like strategy language in the in-browser editor. Start from a template if you like.
2 · Describe	Explain it in plain words	Type a rule such as “buy gold when the 20 EMA crosses above the 50 EMA, risk 1% per trade” and the AI assistant drafts the strategy for you to review and edit.
3 · Backtest	Test before you trust	Run your strategy on years of 1-minute history with spreads, commissions and swaps modelled. Review the equity curve, drawdown, win rate, profit factor, Sharpe ratio, monthly returns and every trade.
4 · Deploy	Runs while you sleep	Deploy to a demo or live account. Your strategy runs in a secure sandbox on Kalks servers, 24/7, and you can pause it or stop it with its kill switch at any time.

03

Marketplace

BODY COPY

Publish your strategy to the Kalks marketplace for free or as a paid subscription, and let other traders run it on their own accounts. Subscribers see verified backtest and live statistics before they subscribe.

MICROCOPY

Marketplace strategies are provided by third parties. Kalks does not endorse any strategy. Past and backtested performance are not reliable indicators of future results.

04

Important

CTAS

Open Strategy Builder

→ https://app.kalks.com/algo/builder

Learn algo trading in the Academy

→ /academy#automation

RISK NOTE

Backtests are simulations based on historical data. They cannot account for all market conditions, slippage or liquidity and are not a reliable indicator of future results. Automated strategies can lose money quickly. Monitor your strategies and use risk limits.

Deposits & withdrawals

At launch Kalks accepts USDT on the Tron network (TRC20) only (D7, D38). The page must remove anxiety: exact steps, times, fees and limits, and the rules that protect clients (KYC before withdrawal, own-wallet only, review of every withdrawal).

URL SLUG	kalks.com/funding
SEO TITLE	Deposits & Withdrawals USDT TRC20 Funding Kalks 51/60
META DESCRIPTION	Fund your Kalks account with USDT on the Tron (TRC20) network. No deposit fee from Kalks, automatic crediting and reviewed withdrawals to your own wallet. 154/155
H1	Fund and withdraw with USDT-TRC20
TEMPLATE	Product / how-to
STRUCTURED DATA	BreadcrumbList, HowTo (deposit), HowTo (withdrawal), FAQPage

01Hero

HEADLINE

Fund and withdraw with USDT-TRC20

SUBHEADLINE

Deposit from any exchange or wallet to your personal address. Your funds are credited automatically after network confirmation, with no deposit fee from Kalks.

CTAS

Deposit now

 → <https://app.kalks.com/wallet/deposit>

Open account

 → <https://app.kalks.com/register>

IMAGERY

The Client Area deposit screen: a USDT-TRC20 QR code, the address TQ7x...9KfE with a copy button, and the “Network: Tron (TRC20)” warning chip. A phone with an exchange app sending USDT sits alongside. Official USDT and TRON logos.

02Methods table

CONTENT

	USDT (TETHER) · TRON (TRC20)
Minimum deposit	10 USDT
Deposit fee (Kalks)	None
Deposit time	Usually 2–5 minutes after [Deposit confirmations] network confirmations
Minimum withdrawal	10 USDT
Withdrawal fee	1 USDT network fee
Withdrawal time	Reviewed within [Withdrawal review time] , then sent on-chain in minutes

Your exchange or wallet may charge its own network fee when you send USDT. Additional networks and coins (USDT-BEP20, USDT-ERC20, BTC, ETH) are planned; show them here only when enabled in the admin panel.

BUILD NOTES

Render from /public/payment-methods so new chains appear automatically. The coming-soon rows use a muted style with a “Coming soon” chip only if the owner enables the flag.

03How to deposit

HEADLINE

Deposit in three steps

CONTENT

- Open your wallet.** In the Client Area, go to Wallet → Deposit and choose USDT (TRC20). You will see your personal deposit address and QR code. It is unique to you and does not change.
- Send USDT on TRC20.** From your exchange or wallet, withdraw USDT to that address, and select the **Tron (TRC20)** network.
- Get credited automatically.** After network confirmation, the USDT appears in your wallet. Move it to any trading account instantly; USDT converts 1:1 to USD (or 1 USDT = 100 USC on Cent accounts).

RISK NOTE

Send only USDT on the Tron (TRC20) network to your deposit address. Sending another token, or using another network, may result in permanent loss of funds.

04How to withdraw

HEADLINE

Withdraw in four steps

CONTENT

- Verify your identity.** Complete identity verification (KYC) once, before your first withdrawal. It usually takes a few minutes.
- Move funds to your wallet.** Transfer from your trading account to your wallet. The amount must be available as free margin.
- Request the withdrawal.** Enter the amount and your own USDT-TRC20 address, then confirm with the one-time code sent to your email.
- Receive your USDT.** Our team reviews the request, then it is sent on-chain. You will see the transaction ID (TXID) in your history.

BUILD NOTES A horizontal stepper with an ember progress line; the “review” step shows a small shield icon with the tooltip “Every withdrawal is reviewed to protect your account.”

05 Limits and rules

CONTENT	ITEM	RULE (FINAL COPY)
	Identity verification	Required before your first withdrawal. You can deposit and trade before verifying.
	Withdrawal limits	Minimum 10 USDT per request; maximum [Daily withdrawal limit] per day. Higher limits are available on request after enhanced verification.
	Recently deposited funds	Funds deposited within the last [Post-deposit cooldown] may need to be held before withdrawal, as part of our anti-fraud checks.
	Own wallet only	Withdrawals are paid only to a wallet you control. We do not pay third parties.
	Bonus credit	Bonus credit cannot be withdrawn. Withdrawing funds may cancel an active bonus in line with the Bonus Terms.
	Transfers	Transfers between your own wallet and trading, copy and PAMM accounts are instant and free. Transfers to other clients are not permitted.
	Security	Every withdrawal needs an email one-time code. Changing your password or login email pauses withdrawals for [Security hold period] .

06 Security of funds

BODY COPY Each client has a unique deposit address generated from Kalks’s own wallet infrastructure. Deposits are swept to cold storage, and only the amount needed for day-to-day withdrawals is kept in a hot wallet. Every day, we reconcile the blockchain, client wallets and trading accounts, and any mismatch is investigated before withdrawals continue.

CTAS [How we protect your funds](#) → /why-kalks#funds

07 FAQ

CONTENT	Q My deposit has not arrived. What should I do? Check that you sent USDT on the Tron (TRC20) network to the address shown in your Client Area, and that the transaction shows as confirmed on a Tron explorer. Most deposits arrive within minutes of confirmation. If it has been more than 30 minutes, contact support with your TXID. Q I sent funds on the wrong network. Can you recover them? Recovery is not always possible. Contact support with your TXID; if recovery is technically possible, a recovery fee of [Recovery fee] may apply. Q Why is my withdrawal pending? Every withdrawal is reviewed for your protection. Reviews are usually completed within [Withdrawal review time]. We will email you if we need anything else. Q Can I withdraw to an exchange address? Yes, as long as the address is on the Tron (TRC20) network and the exchange account is in your name. Q Do you accept bank cards or bank transfers? Not at the moment. Kalks accepts USDT-TRC20. You can buy USDT on most major exchanges with a card or bank transfer and then deposit it.
---------	--

Copy trading

A two-sided page: followers (primary) and strategy providers, called Masters (secondary, anchored at #masters). Emphasise control and transparency, never returns.

URL SLUG	kalks.com/copy-trading
SEO TITLE	Copy Trading Follow Strategy Providers Kalks 48/60
META DESCRIPTION	Copy experienced strategy providers automatically, with your own sizing, drawdown stop and symbol filters. Or become a master and earn performance fees. 152/155
H1	Copy trading, with you in control
TEMPLATE	Two-audience product page
STRUCTURED DATA	BreadcrumbList, FAQPage

01 Hero

HEADLINE

Copy trading, with you in control

SUBHEADLINE

Choose a strategy provider, set your own risk limits and mirror their trades automatically, in real time, in a dedicated account.

CTAS

Browse strategy providers

 → <https://app.kalks.com/copy/leaderboard>

Become a master

 → #masters

RISK NOTE

Copy trading involves significant risk. You can lose money copying any strategy provider. Past performance is not a reliable indicator of future results.

IMAGERY

A leaderboard mock-up with three master cards: a real portrait photo, name (use mock names such as Lucas Ferreira, Fatima Al-Sayed, Nguyen Thu Ha, clearly labelled as illustrative), a risk score gauge (1–10), a 12-month equity sparkline in gold, drawdown, followers.

BUILD NOTES

The illustration must carry the label “Illustrative example”. Never show real-looking return figures above 100% in marketing visuals. The live leaderboard is embedded in section 3 with real data.

02 How it works (followers)

CONTENT

1. Choose.

Compare strategy providers by return, maximum drawdown, risk score, assets under management, followers and track-record age.

2. Set your rules.

Pick how trades are sized and set your equity stop, maximum lot per trade and any symbols to exclude.

3. Copy.

Fund a dedicated copy account from your wallet. Every open, partial close, stop loss or take profit change and pending order is mirrored in real time.

4. Stay in control.

Pause or stop copying at any time. When you stop, you choose whether to close copied positions or keep them.

03 Live leaderboard (embed)

HEADLINE

Strategy providers

SUBHEADLINE

Ranked by risk-adjusted performance. Filter by risk score, return period, drawdown and minimum track record.

MICROCOPY

Statistics are based on the provider’s live copy-trading account, net of fees. Trade history is delayed. Past performance is not a reliable indicator of future results.

BUILD NOTES

Embed the public leaderboard (/public/copy/masters): the top 12 with filters, and each card links to the public master profile on app.kalks.com (equity curve, monthly returns, delayed trade history, fee terms, description). Default sort: risk-adjusted, not raw return. Hide masters with under [[Minimum track record days]] days of history from the default view.

04 Sizing and protection

CONTENT

SETTING	WHAT IT DOES (FINAL COPY)
Equity proportional	Your trade size scales with the ratio of your equity to the provider’s equity.
Fixed lot	Every copied trade uses the same lot size that you choose.
Multiplier	Copies the provider’s lot size multiplied by your factor, for example x0.5 or x2.
Fixed allocation	Copies the provider’s positions in proportion to a fixed amount you allocate.
Equity stop / max drawdown	If your copy account equity falls to your limit, copying stops automatically and all copied positions are closed.
Max lot per trade	Caps the size of any single copied trade.
Symbol filter	Excludes symbols you do not want to trade.

MICROCOPY	Copied positions cannot be closed one by one. To exit, stop copying the provider. This keeps your results and the provider's fees consistent.
-----------	---

05	Fees
BODY COPY	Providers charge a performance fee of their choice, up to [Max performance fee] of new profits, calculated above a high-water mark: you pay only when your copy account reaches a new equity high, net of previous losses. There are no subscription or management fees, and normal trading costs of the provider's account type apply.

06	For masters #masters
HEADLINE	Become a master
SUBHEADLINE	Share your strategy, build a following and earn performance fees on the profits you generate for followers.
BULLETS	- Set your own performance fee within platform limits - Run a copy signal and a PAMM fund from the same strategy - Use manual, API or algorithmic trading on your master account - Public profile with verified statistics, and your referral link built in - Requirements: verified identity, an approved application, at least 30 days of track record and a minimum of your own capital kept in the account
CTAS	Apply as a master → https://app.kalks.com/copy/become-master Read the copy trading terms → /legal/client-agreement#copy
MICROCOPY	Performance fees are credited to your wallet after each settlement and paid out after review.

07	FAQ
CONTENT	Q How much do I need to start copying? The minimum allocation is set by each provider, starting from \$50. Q Can I copy more than one provider? Yes. Each subscription uses its own copy account, so results and fees are tracked separately. Q Will my results match the provider's exactly? Not exactly. Differences in size, timing, available margin, slippage and your own settings mean results can differ. Q Does Kalks check the providers? Providers must verify their identity and be approved, and all statistics come from live accounts on our platform. Kalks does not endorse or guarantee any provider.

PAMM

PAMM (Percentage Allocation Management Module) is a pooled managed account. The concepts (NAV units, rollover, high-water mark) must be explained plainly, with a worked example.

URL SLUG	kalks.com/pamm
SEO TITLE	PAMM Accounts Invest With Money Managers Kalks 50/60
META DESCRIPTION	Invest in PAMM funds run by approved money managers. Transparent NAV units, fees only above a high-water mark, and investor stop-loss protection. 145/155
H1	Managed funds, fully transparent
TEMPLATE	Product page
STRUCTURED DATA	BreadcrumbList, FAQPage

01	Hero
HEADLINE	Managed funds, fully transparent
SUBHEADLINE	Invest alongside approved money managers in pooled PAMM funds. See the fund's value, history and fees before you invest, and set your own stop-loss.
CTAS	Explore PAMM funds → https://app.kalks.com/pamm Become a manager → #managers
RISK NOTE	Investing in a PAMM fund involves risk, and you may lose some or all of your investment. Past performance is not a reliable indicator of future results.

IMAGERY

A fund card mock-up: manager portrait, fund name, NAV per unit 1.2418 (illustrative), a 1Y NAV line in gold over a dotted grid, max drawdown, performance fee, rollover "Weekly". Label: "Illustrative example".

02 How PAMM works

CONTENT

1. **Units, not trades.** A PAMM fund is one trading account managed by a manager. When you invest, you buy units at the fund's net asset value (NAV) per unit.
2. **Profits and losses are shared by units.** As the manager trades, the NAV rises or falls. Your share of the result equals your share of the units.
3. **Rollover.** Investments, withdrawals and fees are processed at the fund's rollover (daily, weekly or monthly, set by the manager). Requests made between rollovers are queued.
4. **Redeem.** Request a withdrawal at any time; your units are redeemed at the next rollover NAV, subject to any lock-in period shown on the fund page.

03 Worked example

CONTENT

You invest \$1,000 when the NAV is 1.2500 per unit, so you receive 800 units. By the next rollover, the manager has grown the fund and the NAV is 1.3000. Your units are now worth \$1,040. The fund's performance fee is 20% of new profit above the high-water mark: $20\% \times \$40 = \8 . Your value after fees is \$1,032. If the NAV later falls and then recovers, no fee is charged until it passes its previous high again.

BUILD NOTES

Present as an animated 3-step calculator with editable amount and NAV fields; the calculations update live.

04 Protection

BULLETS

- **Investor stop-loss:** choose a level (e.g. -20%); if your investment falls to it, your units are redeemed automatically
- **Fund drawdown freeze:** if a fund reaches its maximum drawdown limit, trading is frozen for review
- **Manager commitment:** managers must keep a minimum share of their own capital in the fund
- **High-water mark:** fees only on new profits, per investor

05 For managers #managers

HEADLINE

Run a PAMM fund

BODY COPY

Approved managers can run a PAMM fund alongside a copy signal. Set the rollover period, performance fee (within the platform range of [Min performance fee]–[Max performance fee]) and optional lock-in. Fees crystallise at each rollover and are credited to your wallet after review.

BULLETS

- Verified identity and an approved application
- At least 30 days of track record
- Keep at least [Manager minimum own capital %] of the fund as your own capital

CTAS

[Apply as a manager](https://app.kalks.com/pamm/become-manager) → <https://app.kalks.com/pamm/become-manager>

06 FAQ

CONTENT

- Q What is the minimum investment?**
Each fund sets its own minimum, starting from \$100.
-
- Q Can the manager withdraw my money?**
No. The manager can only trade the fund's account. Only you can redeem your units, and payments always go to your own Kalks wallet.
-
- Q When is the performance fee charged?**
At each rollover, only on profit above your personal high-water mark.

Prop challenges

Kalks Prop lets traders buy an evaluation on a simulated account and, once they pass, trade a simulated funded account with a share of simulated profits paid out. The wording must make the simulated nature unmistakable, and every rule must be stated exactly.

URL SLUG	kalks.com/prop
SEO TITLE	Prop Trading Challenges Get Funded up to \$200K Kalks 56/60
META DESCRIPTION	Pass a 1-step, 2-step or instant challenge and trade a simulated funded account up to \$200,000 with up to 80% profit split and a clear scaling plan. 148/155

Start 1-Step

 → <https://app.kalks.com/register?intent=prop&plan=1step>

Get Instant funding

 → <https://app.kalks.com/register?intent=prop&plan=instant>

BUILD NOTES

A pricing switcher: tabs 2-Step / 1-Step / Instant plus an account-size slider. The card shows the fee, all the rules below for that plan and a CTA. Pull plans from /public/prop/plans (admin plan builder, D147). Never hard-code prices.

03Rules by plan

CONTENT

RULE	2-STEP	1-STEP	INSTANT
Profit target	Phase 1: 8% · Phase 2: 5%	10%	None
Daily loss limit	5% (of start-of-day balance or equity, whichever is higher)	4%	3%
Maximum loss	10% static	6% trailing	6% trailing

RULE	2-STEP	1-STEP	INSTANT
Minimum trading days	4 per phase	3	None
Time limit	Unlimited	Unlimited	—
Consistency rule	None	Best day ≤ 50% of total profit	Best day ≤ 20% of profit per payout
Leverage	1:100	1:100	1:50
News trading (funded)	No trades opened or closed 2 min before/after high-impact news	Same as 2-Step	Same as 2-Step
Weekend holding	Allowed in challenge; not on funded accounts	Same as 2-Step	Not allowed
Profit split	80%	80%	70%
Fee refund	With first payout	With first payout	No

BUILD NOTES Each rule label has an info tooltip with the exact definition from the Prop Challenge Terms. Explain “trailing” with a small animated chart: the loss limit follows the highest balance reached and never moves down.

04 How it works

CONTENT

1. **Buy a challenge** with funds from your Kalks wallet and receive your challenge account instantly.
2. **Trade to the target** within the rules. A live rule dashboard shows your progress, daily loss headroom and drawdown in real time.
3. **Get funded.** Once you pass (and complete identity verification), you receive a simulated funded account and a shareable certificate.
4. **Request payouts** after 14 days, then every 14 days. Approved payouts go to your Kalks wallet, and you can withdraw them in USDT.

05 Scaling plan

HEADLINE

Grow with consistency

BODY COPY

Every 3 months, if your funded account is up at least 10% over the period and you have received at least 2 payouts, your account size increases by 25% and your profit split rises by 5 percentage points, up to 90%. Accounts can scale to a maximum of [Maximum scaled account size].

BUILD NOTES Show a stepped gold bar chart: \$100K → \$125K → \$156K → \$195K, with the split climbing 80 → 85 → 90%.

06 Prohibited strategies

BODY COPY

To keep evaluations fair, the following are not allowed and lead to failure of the challenge or funded account: latency or tick arbitrage, tick scalping that exploits price feed delays, high-frequency trading, copying trades between accounts or with other traders, hedging across accounts, and any practice that takes advantage of simulated execution rather than market skill. Violations are detected automatically and reviewed by our risk team.

07 Breach handling

BODY COPY

If you breach the daily loss limit or maximum loss, the account fails automatically and all positions are closed. You can start a new challenge at any time, and returning traders receive [Retry discount] off their next challenge.

08 FAQ

CONTENT

- Q Is the funded account real money?**
No. Challenge and funded accounts are simulated. Your payouts are rewards paid by Kalks, based on your simulated performance under the rules.
- Q Which instruments can I trade?**
Forex, Metals, Indices, Energies and Crypto CFDs. Stock CFDs are not available on prop accounts.
- Q How is the daily loss limit calculated?**
It is measured from the higher of your balance or equity at the start of each trading day (00:00 server time). Floating losses count toward the limit.
- Q Can I use automated strategies or the API?**
Yes, as long as the strategy is not prohibited (see above) and is not shared across other traders' accounts.
- Q Do I need to verify my identity?**
Yes, before you receive a funded account and before any payout.
- Q How do I get paid?**
Request a payout from your prop dashboard. After review, it is credited to your Kalks wallet, and you can withdraw it in USDT-TRC20.

- Q What happens if I fail?

The account closes. You can buy a new challenge at any time, with [[Retry discount]] off as a returning trader.
- Q Can I hold several challenges?

Yes, up to a combined funded allocation of [[Maximum combined allocation]].

Real photography: a confident professional (diverse, 30s) presenting on a laptop to a small group in a modern office at dusk, graded dark with an ember tint. Overlay: the partner dashboard card (commission this month, network tree, funnel).

02

How it works

CONTENT

1. Join.

Every Kalks client is automatically a Level 1 partner, with a referral link in the Client Area. New to Kalks? Register as a partner in minutes.

2. Refer.

Share tracked links, QR codes, banners and landing pages. Clients who register through you are linked to you permanently.

3. Earn.

Receive commission on every qualifying closed lot your clients trade, including lots generated through their copy trading and PAMM investments, plus a share of your sub-partners' earnings.

4. Get paid.

Commissions accumulate in your dashboard and are paid to your Kalks wallet in regular batches after review.

03

Commission structure #commissions

HEADLINE

Transparent, per-lot commissions

SUBHEADLINE

Rates grow with your level. Figures in USD per standard lot on closed live trades.

CONTENT

SYMBOL GROUP	BRONZE (L1)	SILVER (L2)	GOLD (L3)	PLATINUM (L4)
Forex & Metals	\$4	\$6	\$8	\$10

SYMBOL GROUP	BRONZE (L1)	SILVER (L2)	GOLD (L3)	PLATINUM (L4)
Indices & Energies	\$2	\$3	\$4	\$5
Crypto	\$2	\$3	\$4	\$5
Stocks	\$0.50	\$0.75	\$1.00	\$1.25
CPA per qualified client	\$50	\$100	\$200	\$300

A CPA client qualifies after a first live deposit of at least [CPA minimum deposit] and a first live trade. CPA and per-lot deals can be combined or replaced by a custom deal; ask your partner manager.

BUILD NOTES Pull rates from /public/ib/levels. Add an earnings estimator: sliders for active clients (1–500) and average lots per client per month (1–50), plus a symbol-group select. Output: estimated monthly commission. The label under the result must be: “Illustrative estimate only. Actual commission depends on your clients’ trading activity.”

04 Multi-tier network	
HEADLINE	Earn on the network you build
BODY COPY	Invite other partners as your sub-partners. You earn your full rate on your own clients, plus a share of commission generated in your network: 20% of your Tier 2 sub-partners’ commission and 10% of Tier 3. You can also pass part of your own rate to sub-partners, or give your clients a rebate, within your rate.
BUILD NOTES	An animated network-tree diagram: gold nodes with thin connecting lines, showing Tier 1 → Tier 2 → Tier 3 and the percentage on each edge.

05 Partner levels

CONTENT

LEVEL	ACTIVE CLIENTS	MONTHLY NETWORK VOLUME	BENEFITS
Bronze Partner	—	—	Referral link, dashboard, marketing materials
Silver Partner	10	100 lots	Higher rates, custom campaign links
Gold Partner	30	500 lots	Dedicated partner manager, co-branded landing pages
Platinum Partner	75	1,500 lots	Highest rates, custom deals, priority payouts, event support

Level upgrades are reviewed monthly. Progress bars in the dashboard show exactly what is needed for the next level.

06 Partner tools			
CONTENT	Tracked campaign links Create unlimited links and see each one’s funnel: clicks → sign-ups → first deposits → active traders.	Banners & landing pages Ready-made, translated creatives and landing pages in every Kalks language.	QR codes Download a QR code for any link, for events, print or social media.
	Client reporting Client activity, trading volume and commission per trade, exportable to CSV.	Regular payouts Commissions are credited to your wallet in regular batches. Withdraw them in USDT or use them to trade.	Network tree See your full network of clients and sub-partners, their levels and their activity.

07 Fair play	
BODY COPY	Commission is paid only on genuine trading. Trades held for less than [Minimum trade duration] do not qualify. Self-referrals, multiple accounts, wash trading and hedging between referred clients are detected and disqualified. Client attribution is permanent from sign-up and can be changed only by Kalks. Partners must follow our marketing guidelines: no profit promises, no misleading claims and the risk warning on all promotional material.
MICROCOPY	Partners are independent and are not authorised to give investment advice on behalf of Kalks.

08 FAQ	
CONTENT	Q Does it cost anything to become a partner? No. The programme is free to join. Q When and how am I paid? Commissions accumulate as pending and are paid to your Kalks wallet in scheduled batches (daily, weekly or monthly, depending on your deal) after review. You can withdraw them in USDT-TRC20. Q Can I see my clients’ trades? Yes. You can see client activity and the trades that generate your commission, in line with our privacy policy and the consent clients give at sign-up.

- Q Do I need to be a client myself?

You need a Kalks Client Area account to receive payouts. You do not need to trade.
- Q Can I offer my clients a rebate?

Yes. You can share part of your rate with your clients as a rebate from your dashboard.

MICROCOPY

Promotions are not available in every country. Eligibility is shown in your Client Area.

IMAGERY

3D glossy trophy, gold coins and a gift-box accent on a dark background with an ember glow. Avoid casino imagery (dice, slot machines, confetti explosions).

02

Active promotions #active

BUILD NOTES

A CMS-driven card grid (admin Marketing → Banners/Contests/Bonus). Each card: image, title, one-line summary, dates, eligibility (country list from the campaign), a “View terms” link (a modal or /legal/bonus-terms#campaign-id) and a CTA to app.kalks.com. Geo-filter the cards by visitor country and hide ineligible campaigns.

03

Trading contests

HEADLINE

Trading contests

BODY COPY

Test your skills against other traders in monthly demo and live contests. Rankings are based on percentage return with a maximum drawdown rule, so skill matters more than account size. Live leaderboards update in real time.

BULLETS

- Demo contests: free to enter, virtual funds, prizes of [Demo contest prize pool]
- Live contests: trade your own live account; prizes of [Live contest prize pool]
- Prizes are credited to your Kalks wallet after verification of results

CTAS

Join a contest

 → <https://app.kalks.com/rewards/contests>

RISK NOTE

Live contests involve real trading with real money and the risk of losses. Do not change your trading behaviour to win a contest.

04

Kalks Points (loyalty)

HEADLINE

Earn Kalks Points on every lot

BODY COPY

Earn 10 Kalks Points for every standard lot you trade on a live account. Redeem points in the Client Area for cashback to your wallet (1,000 points = \$10), discounts on prop challenges or academy extras. Points expire 12 months after they are earned.

CONTENT	TIER	POINTS MULTIPLIER	QUALIFYING VOLUME (PER QUARTER)
	Explorer	×1.0 *****	—
	Trader	×1.2 *****	50 lots *****
	Elite	×1.5 *****	250 lots *****
	Master	×2.0 *****	1,000 lots *****

05Trading bonus

HEADLINE

Trading bonus

BODY COPY

When a bonus campaign is running, eligible clients can receive a trading bonus as credit on a live account. Bonus credit counts toward your equity and margin, but it cannot be withdrawn. It is released to your balance progressively as you trade: \$1 released per [Bonus release lots] lots traded. Unreleased bonus credit is removed at expiry or if you withdraw funds from the account.

CTAS

[Read the Bonus Terms](#) → /legal/bonus-terms

RISK NOTE

A bonus does not reduce the risk of trading. Losses are deducted from your own funds first. Bonuses are subject to the Bonus Terms and are not available in all jurisdictions.

06Share your results

BODY COPY

Share a branded image of any closed trade or your monthly performance directly from the Client Area. Your partner link is built in, so friends who join through it are linked to you.

MICROCOPY

Shared results show past performance only. Please share responsibly and never present results as a promise of future returns.

Economic calendar

A high-traffic SEO tool page. It must load fast, work without an account and funnel users into the terminal.

URL SLUG	kalks.com/tools/economic-calendar
SEO TITLE	Economic Calendar Live Forex & Market Events Kalks54/60
META DESCRIPTION	Live economic calendar with high, medium and low impact events, forecasts and actual results for every major economy. Filter by currency and impact.148/155
H1	Economic calendar
TEMPLATE	Tool page
STRUCTURED DATA	BreadcrumbList, Dataset (optional), Event (for major releases)

01Header

HEADLINE

Economic calendar

SUBHEADLINE

Every scheduled release that can move the markets, with forecasts, previous values and actual results as they are published.

BUILD NOTES

A compact header with the filter bar: date range (Today · Tomorrow · This week · Next week · Custom), impact (High · Medium · Low), currency/country multi-select with flags, time-zone selector (defaults to the visitor's local time, with server time as an option) and search.

02Calendar table

CONTENT

COLUMN	CONTENT
Time	Local time; a countdown for the next event; “Live” pulse at release
Impact	A left colour bar: red high, amber medium, grey low
Currency	Flag + currency pill
Event	Event name; click to expand the description, history chart and affected symbols
Actual / Forecast / Previous	Actual coloured green if better than forecast, red if worse
Action	“Set alert” (requires login) · “Trade EURUSD” deep link to the terminal

BUILD NOTES

Data from the licensed calendar provider (D102: Infoways if available, otherwise Trading Economics/FXStreet). Show the provider attribution required by the licence. Server-render the next 7 days for SEO, then update live over WebSocket. Row height 44, sticky day headers.

03

Explainer (SEO copy under the tool)

HEADLINE

How to use the economic calendar

BODY COPY

Economic releases such as interest-rate decisions, inflation (CPI), employment (Non-Farm Payrolls) and GDP can cause sharp price moves and wider spreads. The impact rating shows how much an event has historically moved the market.

Many traders avoid opening new positions just before high-impact events, or reduce their position size. If you trade a prop challenge, check the news-trading rules for your plan.

CTAS

Open the Web Terminal → <https://trade.kalks.com> [Learn: trading the news](#) → </academy#fundamentals>

REF P24 PAGE SPECIFICATION · TOOLS

Trading calculators

Six calculators on one page (tabs with deep links). They are exact and consistent with the platform’s contract specifications. The same component powers the risk calculator in the terminal ticket.

URL SLUG	kalks.com/tools/calculators
SEO TITLE	Trading Calculators Position Size, Pip & Margin Kalks 57/60
META DESCRIPTION	Free trading calculators: position size, pip value, margin, profit and loss, swap and currency conversion, using live Kalks contract specifications. 148/155
H1	Trading calculators
TEMPLATE	Tool page (tabs)
STRUCTURED DATA	BreadcrumbList, WebApplication, FAQPage

01

Calculators

CONTENT	TAB (#ANCHOR)	INPUTS	OUTPUTS	FORMULA / NOTES
	Position size (#position-size)	Account currency, balance, risk % or amount, stop loss (pips/points), symbol	Lot size, risk amount, pip value	Lots = Risk amount ÷ (SL in pips × pip value per lot). Round down to the lot step (0.01).
	Pip value (#pip-value)	Symbol, lot size, account currency	Value of one pip/point	Pip value = Pip size × Contract size × Lots, converted to the account currency at the live rate.
	Margin (#margin)	Symbol, lot size, leverage, account type	Required margin	Margin = Lots × Contract size × Price ÷ min(account leverage, instrument max leverage).
	Profit / loss (#profit)	Symbol, direction, lots, open price, close price	P&L in account currency (and USC for Cent), pips	P&L = (Close – Open) × Contract size × Lots (reversed for sells), converted.
	Swap (#swap)	Symbol, direction, lots, nights	Swap cost or credit	Uses the live swap long/short per symbol and applies the triple-swap day.
	Currency converter (#converter)	Amount, from, to	Converted amount	Mid-market rate, for information only.

BUILD NOTES

Symbol pickers load contract specifications from /public/symbols. Prices prefill from the live feed with an option to override. Results update on input change (no submit button), with a large result number using dimmed decimals. Every tab has a “Use in Web Terminal” link that opens the order ticket with the values prefilled. Cent toggle: show results in USC.

02

Explainer copy

HEADLINE

Size every trade before you place it

BODY COPY

Professional traders decide how much they are prepared to lose before they enter a trade. Use the position size calculator to turn that risk into the right lot size for your stop loss. Results are estimates based on current prices and contract specifications and do not include spread, commission or slippage.

03 FAQ

CONTENT

Q How much should I risk per trade?

There is no single right answer. Many traders risk a small, fixed percentage of their balance, such as 1–2%, so that a series of losses does not seriously damage their account.

Q Why does my margin differ from the calculator?

Margin can be higher around weekends, holidays or major news, and hedged positions use a reduced rate. The terminal always shows the exact margin before you confirm.

Market news & daily brief

A news hub fed by the same news service as the Client Area and terminal (D44), plus the AI-assisted daily market brief (D138). Useful for SEO and return visits. AI content needs clear labelling.

URL SLUG	kalks.com/tools/market-news
SEO TITLE	Market News & Daily Brief Forex, Gold, Crypto Kalks 55/60
META DESCRIPTION	Latest market news tagged by symbol and country, a world news map and a concise daily market brief covering the news and calendar events that matter. 149/155
H1	Market news and daily brief
TEMPLATE	News hub
STRUCTURED DATA	BreadcrumbList, NewsArticle (brief), ItemList

01 Daily market brief

HEADLINE

Today’s market brief

SUBHEADLINE

The day’s key themes, levels to watch and scheduled events, in under three minutes.

BODY COPY

The brief is published each morning at [Brief publish time] server time. It is generated with AI from our news feed and the economic calendar, then reviewed by the Kalks markets team before publication.

MICROCOPY

The daily brief is for information only and is not investment advice or a recommendation to trade. AI-assisted content may contain errors.

BUILD NOTES

Brief page URL: /tools/market-news/brief/{yyyy-mm-dd}, indexable, with NewsArticle schema and an archive by date. Include “AI-assisted · Reviewed by [Editor name]” in the byline area.

02 News feed

BUILD NOTES

An infinite list with filters by asset class, symbol, country and source. Each item: time, source, headline, tags (symbol chips link to market pages), and a short summary (licensing permitting). Admin-pinned items appear first; hidden items never render. Link out to the full source article if the licence does not allow full text.

03 World news map

BODY COPY

See where the news is happening. Pins show the latest headlines by country, and the trading-session overlay shows which markets are open right now.

BUILD NOTES

react-simple-maps with a dark world and gold dots. Pins sized by the number of headlines in the last 24h. The session bands for Sydney/Tokyo/London/New York show countdowns. On mobile, a list view replaces the map.

Academy

Structured education for every level, managed per language in the Content CMS (D137). The public catalogue is indexable; progress, quizzes and demo challenges require a free account.

PAGE SPECIFICATION · COMPANY

About Kalks

Who we are and why we exist. It must be credible without invented history: all company facts are placeholders until confirmed.

URL SLUG	kalks.com/about
SEO TITLE	About Kalks A Global Multi-Asset Broker41/60
META DESCRIPTION	Kalks builds precise, transparent trading for self-directed traders worldwide: our mission, our technology, our values and the company behind the brand.152/155
H1	Built for traders who read the decimals
TEMPLATE	Company page
STRUCTURED DATA	Organization (legalName, address, foundingDate once confirmed), BreadcrumbList

01Hero

HEADLINE

Built for traders who read the decimals

SUBHEADLINE

Kalks is a global multi-asset broker with one simple belief: serious traders deserve institutional-grade tools and conditions they can verify, whatever the size of their account.

IMAGERY

Real photography of the Kalks team or office ([Office city]). Until real photos exist, use a night-time skyline of ([Office city]) with an ember grade. Do not use stock photos of “team” people presented as Kalks staff.

02Our story

BODY COPY

Kalks was founded in ([Year founded]) by traders and engineers who spent years using platforms that were built for the broker, not the trader. Conditions were hidden in PDFs, withdrawals were a mystery, and the tools felt a decade old.

We set out to build the opposite: a platform where every spread, fee and rule is visible before you trade, where the terminal is as good as the tools professionals use, and where copy trading, managed funds, prop evaluations and automation live in one account instead of five. We built the technology in-house, from the trading engine to the Web Terminal, so we control how it works for our clients.

BUILD NOTES

Optional horizontal timeline (founding → platform launch → milestones). Populate only with confirmed dates: ([Company milestones]).

03Mission and values

HEADLINE

What we stand for

CONTENT

Precision

We publish exact conditions and build tools that give exact answers. If a number matters to your trade, you can see it.

Transparency

Costs, rules and risks are stated up front, in plain language, on the same page as the benefit.

Control

You decide your leverage, your position mode, your risk limits and who can see your account.

Responsibility

We are honest about the risks of leveraged trading, and we design our products to protect clients, not to encourage overtrading.

REF P28 PAGE SPECIFICATION · COMPANY

Why Kalks & safety of funds

The trust page. Every statement here describes a real mechanism in the platform (D9, D11, D16, D20, D39, D111, D117, D141). No vague “bank-grade security” claims.

URL SLUG	kalks.com/why-kalks
SEO TITLE	Why Kalks Safety of Funds & Security Kalks 46/60
META DESCRIPTION	How Kalks protects your funds and data: cold-storage custody, reviewed withdrawals, email OTP security, negative balance protection and daily checks. 149/155
H1	Why traders choose Kalks
TEMPLATE	Trust page with anchors #regulation #funds #security #fair-trading
STRUCTURED DATA	BreadcrumbList, FAQPage

01 Hero

HEADLINE	Why traders choose Kalks
SUBHEADLINE	Clear conditions, modern tools and serious protection for your funds and your data. Here is exactly how it works.
IMAGERY	A 3D glossy shield and vault accent on a dark ember-lit background, paired with a real macro photograph of a server room with a warm grade.

02 Why Kalks: differentiators

CONTENT	Conditions you can verify Spreads, commissions, swaps, hours and margin rules are published for every symbol and shown in the terminal before you trade.	A modern terminal In-house charts, on-chart trading, a risk calculator and bulk actions, in the browser and on your phone.	Everything in one account Trading, copy trading, PAMM, prop challenges, API and partner tools, all with one login and one wallet.	Fast crypto funding USDT-TRC20 deposits credited automatically after network confirmation, with no deposit fee from Kalks.
	Support in your language 20+ languages across the website, platform and support.	Built in-house We develop our own trading engine and platform, so we can improve it quickly for our clients.		

03 Regulation #regulation

HEADLINE	Regulation
BODY COPY	[Company legal name] is authorised and regulated by [Regulator name] under licence number [Licence no.]. [Regulatory protections statement]. You can verify our licence on the regulator’s public register: [Regulator register URL].
BUILD NOTES	Show this section only once the licence is granted. Link to the regulator register URL, opening in a new tab. If Kalks operates several entities, render a tab per entity.

04 Protection of client funds #funds

HEADLINE	How we look after your funds
----------	------------------------------

BULLETS

- [Client funds segregation statement]
- **Own custody, mostly offline.** Crypto deposits go to a unique address generated for you from our own wallet infrastructure. Funds are swept to cold storage, and only what is needed for daily withdrawals is kept in an online hot wallet.
- **Daily reconciliation.** Every day we reconcile balances on the blockchain, in client wallets and in trading accounts. Any difference is investigated before withdrawals continue.
- **Every withdrawal reviewed.** Withdrawals are checked against your identity, account activity and device history, and paid only to a wallet in your name.
- **Negative balance protection.** Your trading account balance cannot fall below zero.

05Account security #security

HEADLINE

Security built into every account

BULLETS

- Email one-time passcodes for new-device logins, withdrawals and changes to passwords or credentials
- See every active session and log out other devices in one click
- Separate trading and investor (read-only) passwords for each trading account
- View-only logins for your accountant or mentor, with an expiry date and revocation at any time
- API keys with read-only or trade scopes, IP allow-lists and expiry. API keys can never withdraw funds
- Encryption in transit (TLS) and at rest; wallet keys held in dedicated key-management systems, never in plain text

06Fair trading #fair-trading

HEADLINE

Fair and transparent trading

BODY COPY

Our Order Execution Policy explains how your orders are handled, including slippage, which applies in both directions. Every order is tagged with its source (manual, API, strategy, copy or PAMM) and recorded in your history. If a trade ever has to be corrected because of a clear pricing error, the correction is shown on your statement with an explanation. Staff actions on client accounts are recorded in an audit log that cannot be altered.

CTAS

[Read the Order Execution Policy](#) → /legal/order-execution-policy

07Responsible trading

BODY COPY

Leveraged trading is not suitable for everyone. We give you tools to stay in control: demo accounts, risk calculators, margin alerts, analytics that flag overtrading, and the option to reduce your leverage. If you feel that trading is affecting your wellbeing or finances, contact support and we can help you restrict or close your account.

08Trust badges + final CTA

HEADLINE

Trade with confidence in how your account is run.

H1	Help Centre
TEMPLATE	Help hub + topic pages
STRUCTURED DATA	FAQPage (per topic page), BreadcrumbList, WebSite SearchAction

01 Hero with search

HEADLINE	Help Centre
SUBHEADLINE	Search our answers, or ask the Kalks assistant, available 24/7.
BUILD NOTES	A large search field ("Search for answers, e.g. withdrawal time") with instant client-side search over all Q&As (Fuse.js), topic chips below it, and an "Ask the assistant" button that opens chat with the query prefilled.

02 Topic tiles

CONTENT	Getting started · Accounts · Deposits & withdrawals · Verification & security · Trading · Platforms · Copy trading, PAMM & prop · Partners
BUILD NOTES	8 tiles, each with an icon, topic name and question count.

Getting started 6

Q How do I open a Kalks account?

Select “Open account”, enter your email, phone number and a password, and verify both with one-time codes. It takes about three minutes. You can then open trading accounts and deposit straight away.

Q Who can open an account?

Individuals aged 18 or over, and companies, who are not residents of a restricted region. The list of restricted regions is in the footer of every page and in our Client Agreement.

Q Can I open a corporate account?

Yes. Choose “Corporate” during registration. Verification requires incorporation documents and details of directors, ultimate beneficial owners and authorised traders.

Q Is there a demo account?

Yes. Demo accounts are free, use virtual funds on real-time prices, last 10 days and can be refilled from the Client Area.

Q Can I sign up with Google?

Yes. You can register and log in with Google or with your email and password. Phone verification is still required.

Q What languages do you support?

The website, Client Area, Web Terminal and support are available in 20+ languages, including Arabic and other right-to-left languages.

Accounts 7

Q Which account type should I choose?

Cent suits small, real-money testing; Standard suits most traders; Pro offers tighter spreads for active traders; ECN offers raw spreads plus commission for scalpers and algorithms. See the Account types page for a full comparison.

Q What is the difference between hedging and netting?

Hedging lets you hold several positions, including opposite ones, on the same symbol. Netting keeps one net position per symbol: opposite orders reduce or reverse it.

Q How many accounts can I open?

You can hold several live and demo accounts in one Client Area, up to the limit shown when you open a new account.

Q Can I change my leverage?

Yes, from the Client Area, as long as the account has no open positions. You can choose from the options available for your account type.

Q What is a Cent account?

An account whose balance is shown in US cents (USC). \$10 appears as 1,000 USC. Lot sizes are the same as on standard accounts.

Q How do I get a swap-free account?

Request swap-free status from the account settings in the Client Area. It is available on all account types, subject to approval.

Q What are the trading and investor passwords?

Each trading account has a trading password for full access and an investor password that gives read-only access to the terminal. You can change both in the Client Area after confirming with an email code.

Deposits & withdrawals 8

Q Which payment methods do you accept?

USDT on the Tron (TRC20) network. More networks and coins will be added and listed on the Deposits & withdrawals page.

Q How long do deposits take?

Usually a few minutes after the transaction is confirmed on the Tron network. Crediting is automatic.

Q Are there any deposit fees?

Kalks does not charge a deposit fee. Your exchange or wallet may charge a network fee to send USDT.

Q What is the minimum deposit?

The minimum wallet deposit is 10 USDT. Account minimums are \$10 (Standard, Cent), \$200 (Pro) and \$500 (ECN).

Q How do I withdraw?

Move funds from your trading account to your wallet, request a withdrawal to your own USDT-TRC20 address, and confirm with the email code. The request is reviewed and then sent on-chain.

Q How long do withdrawals take?

Requests are reviewed within [Withdrawal review time] and then sent on-chain, which usually takes a few minutes. You will see the transaction ID in your history.

Q Why was my withdrawal rejected?

Common reasons are incomplete identity verification, an address on the wrong network, insufficient free margin, or an address not in your name. The rejection email explains the reason and what to do next.

Q How does USDT convert to my account currency?

USDT converts 1:1 to USD when you transfer it to a trading account. On Cent accounts 1 USDT becomes 100 USC.

Verification & security 6

Q When do I need to verify my identity?

Before your first withdrawal. You can register, deposit and trade before verifying.

Q What documents do I need?

A government-issued photo ID (front and back), a proof of address dated within the last three months, and a quick selfie or liveness check.

Q How long does verification take?

Most verifications are completed automatically within minutes. Some are reviewed manually, which can take up to **[KYC manual review time]**.

Q Can I change my name or date of birth?

Not after verification. Contact support with supporting documents if a correction is needed. Changing your address or phone number requires re-verification.

Q How is my account protected?

Email one-time codes protect new-device logins, withdrawals and credential changes. You can view active sessions and log out other devices at any time.

Q I received a message asking for my password. Is it from Kalks?

No. Kalks will never ask for your password, one-time codes or wallet private keys. Report the message to **[Compliance email]**.

Trading 8

Q What are your trading hours?

Forex trades 24/5, Metals and Energies 24/5 with a daily break, Indices by exchange session, Stocks during the US session, and Crypto 24/7. All times are server time, GMT+2/+3.

Q What is a margin call and stop-out?

A margin call warns you when your margin level falls to your account's margin-call level. At the stop-out level, positions are closed automatically, starting with the largest loss.

Q Can I lose more than my deposit?

No. Negative balance protection resets a negative balance to zero.

Q What order types can I use?

Market, Limit, Stop and Stop-Limit, with trailing stops, OCO brackets, partial close and Close By in hedging mode.

Q What is slippage?

The difference between the requested price and the fill price in fast markets. It can be positive or negative. You can set a maximum deviation in the order ticket.

Q When are swaps charged?

At 00:00 server time on positions held overnight, with a triple swap on Wednesday for Forex and Metals. Crypto swaps apply every day.

Q Do you allow scalping, hedging and automated trading?

Yes. Scalping, hedging and automated trading are allowed on live accounts, provided they do not exploit pricing errors or latency. Prop accounts have additional rules.

Q Why did my spread widen?

Spreads are variable and can widen at the daily rollover, around major news and when liquidity is low.

Platforms 5

Q Do I need to download anything?

No. The Web Terminal runs in your browser. On mobile, you can install the Kalks app from your browser in two taps.

Q Do you offer MetaTrader?

Kalks uses its own Web Terminal with in-house charts, available in the browser and on mobile. For automation, use the Strategy Builder or our API.

Q How do I get API access?

Create an API key for any trading account in the Client Area under API & Algo. Keys can be read-only or trade-enabled and never allow withdrawals.

Q Is FIX available?

Yes, FIX 4.4 is available on request for institutional clients. Contact the API team.

Q Can I run a strategy while my computer is off?

Yes. Strategies deployed from the Strategy Builder run 24/7 on Kalks servers.

Copy trading, PAMM & prop 6

Q What is the difference between copy trading and PAMM?

In copy trading, the provider's trades are mirrored into your own copy account with your own settings. In PAMM, you buy units in a pooled fund managed by a manager, and results are shared by units at each rollover.

Q How are performance fees charged?

Only on new profits above a high-water mark, at settlement. No subscription or management fees.

- Q Can I stop copying at any time?

Yes. When you stop, you can close the copied positions or keep them open in your copy account.
- Q Are prop funded accounts real money?

No. Prop challenge and funded accounts are simulated. Payouts are rewards paid by Kalks based on your simulated performance under the plan rules.
- Q How do prop payouts work?

Request a payout from your prop dashboard after the minimum period. After review, it is credited to your Kalks wallet for withdrawal.
- Q Can I lose money with copy trading or PAMM?

Yes. You can lose some or all of the money you allocate. Past performance is not a reliable indicator of future results.

Partners 4

- Q How do I become a partner?

Every Kalks client is automatically a Level 1 partner with a referral link. You can also register directly as a partner.
- Q How are commissions calculated?

Per standard lot on your referred clients' closed live trades, at the rate for your level and the symbol group, plus your share from sub-partners.
- Q When are commissions paid?

In scheduled batches to your Kalks wallet after review.
- Q Can I move a client to my network?

Client attribution is permanent from registration. Only Kalks can reassign a client, in exceptional cases.

CONTENT NOTE

Answers are written to stay true when parameters change, but a few reference configurable values (fees, limits, review times). Render those from the same config source as the rest of the site, or review this page whenever the admin configuration changes.

REF P32 PAGE SPECIFICATION · LEGAL

Legal documents

A legal hub at /legal plus one page per document. This specification provides the purpose and a summary of each document for the hub. The legal text itself must be drafted by the company's lawyers.

URL SLUG	kalks.com/legal
SEO TITLE	Legal Documents & Policies Kalks 34/60
META DESCRIPTION	Kalks legal documents: Client Agreement, Risk Disclosure, Privacy, AML/KYC, Cookie, Complaints, Order Execution, Bonus Terms and Prop Challenge Terms. 150/155
H1	Legal documents
TEMPLATE	Hub + document template
STRUCTURED DATA	BreadcrumbList; WebPage with dateModified per document

COMPLIANCE NOTE

The final legal text must come from the company's lawyers. The summaries below are the short descriptions shown on the hub and at the top of each document page. They are not legal text and must not be used as the documents. Each document must be reviewed for every jurisdiction in which Kalks operates before publication.

01 Hub page	
HEADLINE	Legal documents
SUBHEADLINE	The agreements and policies that govern your relationship with Kalks. Please read them carefully before opening an account.
MICROCOPY	Kalks is a trading name of [Company legal name]. If a translation differs from the English version, the English version prevails.
BUILD NOTES	A list of document cards (title, summary, version number, effective date, "Read" and "Download PDF"). Documents come from the Legal CMS in the admin (D40, D121): versioned, per language, with an effective date. When a new version is published, the Client Area asks users to re-accept it (with an acceptance log recording IP and timestamp). The website shows the current version and links to the archive of previous versions.

Document summaries (hub copy)

DOCUMENT	URL	SUMMARY FOR THE HUB (FINAL COPY)	NOTES FOR COUNSEL / DEVELOPER
Client Agreement	/legal/client-agreement	The main contract between the client and [Company legal name] : account opening and eligibility, services provided (CFD trading, wallet, copy trading, PAMM, API), the client's obligations, margin and stop-out, negative balance protection, fees and swaps, handling of errors and price corrections, abusive trading, account closure and data export, communications, liability, governing law ([Governing law]) and dispute resolution.	Must include the sections for copy trading, PAMM and API use (or separate schedules), the consent to share client activity with the introducing partner (D61), and the rule that versions must be re-accepted (D40).
Risk Disclosure	/legal/risk-disclosure	Explains the risks of trading leveraged CFDs: leverage and margin, volatility and gaps, slippage, liquidity, crypto CFD risks, counterparty risk (Kalks as principal), technology and connectivity, automated trading, copy trading and PAMM, and currency conversion. Includes the [XX] % retail loss figure.	This is the link target of the top risk bar. Keep it written in plain language.
Privacy Policy	/legal/privacy-policy	What personal data Kalks collects (identity, KYC documents, contact details, device and usage data, trading and wallet records), why (contract, legal obligation, legitimate interest, consent), who it is shared with (KYC provider, email/SMS providers, partners with consent, regulators), international transfers, retention, and the client's rights. Contact: [DPO email] .	Name the data controller ([Company legal name]) and, where applicable, the supervisory authority ([Data protection authority]).
AML / KYC Policy	/legal/aml-kyc-policy	Kalks's commitment to preventing money laundering and terrorist financing: identity verification before withdrawal, document requirements, corporate verification (directors, UBOs), sanctions and PEP screening with periodic re-screening, transaction monitoring, source-of-funds requests, the right to refuse or suspend, and record keeping.	A public summary is enough. The full internal AML manual stays internal.
Cookie Policy	/legal/cookie-policy	Which cookies and similar technologies the website and Client Area use (essential, analytics, marketing), their purposes, duration and providers, and how to change consent through Cookie settings.	Generate the cookie table from the consent platform scan so it stays current.
Complaints Procedure	/legal/complaints-procedure	How to raise a complaint ([Complaints email] or the Client Area), what to include, acknowledgement within [Complaint acknowledgement time] , final response within [Complaint resolution time] , and escalation to [External dispute resolution body] if the client is not satisfied.	Must match the regulator's complaint-handling rules exactly.
Order Execution Policy	/legal/order-execution-policy	How orders are executed: Kalks acts as principal; execution factors (price, cost, speed, likelihood); market execution; order types and expiry; slippage in both directions; requotes and maximum deviation; gaps, weekends and holidays; price sources and the handling of manifest errors; monitoring of execution quality.	Must accurately reflect the A/B-book routing (D2, D25, D140) and any execution-delay settings (D117). Counsel to confirm the wording.
Bonus Terms & Conditions	/legal/bonus-terms	General terms for all trading bonuses and promotions: eligibility and excluded countries, the bonus as non-withdrawable credit, the release rate per lot traded, the effect of withdrawals and transfers, expiry, abuse (e.g. hedging between accounts), and Kalks's right to cancel. Campaign-specific terms appear as numbered schedules.	Bonuses are restricted or banned in some jurisdictions. Counsel to provide the country list.
Prop Challenge Terms	/legal/prop-challenge-terms	Terms for prop challenges: simulated nature of all challenge and funded accounts, fees and refunds, exact definitions of every rule (daily loss, maximum loss, trailing, consistency, news and weekend rules), prohibited strategies, KYC, payout calculation and schedule, scaling, account termination, and the fact that no employment or investment relationship is created.	Must use the same rule definitions as the prop rule engine (D148) and the public /prop page.

Recommended additional documents

- Website Terms of Use
- Partner (IB) Agreement and marketing guidelines
- Copy Trading & PAMM Terms (for followers, investors, masters and managers), if not scheduled in the Client Agreement
- Conflicts of Interest Policy
- Strategy Marketplace Terms and API Terms of Use
- Key Information Documents (KIDs) per product, if required by the regulator
- Responsible Trading statement
- Vulnerability / Accessibility statement

CTAS	Back to home → / Visit the Help Centre → /help
IMAGERY	A gold price line over a dotted grid that runs off the right edge of the frame, with a dashed crosshair at the break point showing the label "404.00". Built in SVG, not a photo.
BUILD NOTES	Return an HTTP 404 status and noindex. The line draws in (900ms) and the crosshair label counts to 404.00. Log a page_not_found event with the requested path and referrer. Keep the header, footer and risk bar.

Sign-up and login entry points

The website does not host authentication. All sign-up and login happen on app.kalks.com (D21, D27, D34). This section defines the redirects, parameters and expectations so the hand-off is seamless.

URL SLUG	kalks.com/register, /login, /demo (redirects)
SEO TITLE	Open an Account Kalks 23/60
META DESCRIPTION	Open your Kalks account in minutes. Register with email or Google, verify your phone and start trading Forex, gold, indices and crypto CFDs. 140/155
H1	— (redirect, no page body)
TEMPLATE	301/302 redirects to app.kalks.com

01 Routes

CONTENT

WEBSITE PATH	REDIRECTS TO	TYPE
/register, /signup, /open-account	https://app.kalks.com/register (+ preserved query)	302
/login, /signin	https://app.kalks.com/login	302
/demo	https://app.kalks.com/register?type=demo	302
/partner-signup	https://app.kalks.com/register?intent=partner	302
/trade	https://trade.kalks.com	302
/?ref=CODE (any page)	Stores ref for 90 days; appends ?ref=CODE to every app.kalks.com link	—

BUILD NOTES

Use 302s (not 301) so targets can change per campaign. Always append lang, ref and UTM parameters. The Client Area auto-fills the referral code from ?ref= (D34).

02

What the visitor meets on app.kalks.com (for alignment)

BULLETS

- Registration fields: full name, email (login ID), country (restricted countries blocked, D33), date of birth, phone with country code, password, referral code (auto-filled), and acceptance of the Client Agreement, Risk Disclosure, Privacy Policy and an 18+ confirmation
- Email and phone verification by one-time code; “Continue with Google” option
- An onboarding checklist after registration: Verify → Deposit → First trade, with a guided tour
- Login: email + password or Google; email OTP on new devices

BUILD NOTES

Match the visual language of the app auth screens (same background photography and ember glow) so the hand-off feels like one product.

The website header “Open account” CTA must never open a modal form on the website itself.

03

Header microcopy

CONTENT

Open account · Log in · Try free demo

Tooltip on “Log in” for partners: “Partners log in to the same Client Area.”

03

Developer appendix

Stack, tokens, components, imagery sourcing, SEO, performance, accessibility, analytics and the placeholder register.

Recommended stack & architecture

Match the Client Area and Admin apps in the monorepo so the website shares tokens, components, i18n and assets.

LAYER	CHOICE	NOTES
Framework	Next.js (App Router) + React + TypeScript	New app apps/website in the existing pnpm + Turborepo monorepo; local port :3003 (D21). Use static generation (SSG) and incremental static regeneration (ISR, revalidate 60–300s) for marketing pages; live data is hydrated on the client.
Styling	Tailwind CSS v4 + design tokens from packages/ui	Reuse the CSS variables in D2. shadcn/ui (Radix) primitives for accordion, tabs, dialog, popover and select.
Motion	Motion (framer-motion), GSAP for count-ups and hero, React Bits components sparingly (SplitText, SpotlightCard, CountUp)	Every animation is gated by prefers-reduced-motion.
Charts	In-house, built on the open-source lightweight-charts library	Sparklines, hero charts, calculators. The full terminal is a separate app.
Tables	TanStack Table	Market watch, instrument tables, calendar.
Maps & flags	react-simple-maps + world-atlas; flag-icons	Sessions map, news map, language selector.
i18n	next-intl with the shared packages/i18n	Locale-prefixed routes, RTL, ICU plurals, locale-aware number and date formats (D26).
Content	Code-managed per tenant (D121) + MDX for academy and legal fallbacks	Promotions, legal documents, news and academy content come from the platform's CMS/Content APIs.
Data	Public read-only endpoints on api.kalks.com/public/*	account-groups, symbols, quotes (WS), payment-methods, prop/plans, ib/levels, copy/masters, calendar, news. Cache at the edge (60s), never expose private data.
Hosting	Vercel or self-hosted Node behind a CDN (Cloudflare)	Image optimisation via next/image; Brotli; HTTP/3.
Forms	Server actions → support inbox API	Turnstile/hCaptcha, rate limits, no PII in analytics.
Consent	A CMP compatible with Google Consent Mode v2 (e.g. Cookiebot, Usercentrics or a custom-built one)	Default denied; categories as in A5-3.

Suggested project structure

```
apps/website/
  app/[locale]/(marketing)/page.tsx           # Home
  app/[locale]/markets/[assetClass]/page.tsx  # shared asset-class template
  app/[locale]/accounts/... trading/conditions/ platforms/[slug]/
  app/[locale]/funding copy-trading pamm prop partners promotions
  app/[locale]/tools/[tool] academy/[...slug] help/[...topic] legal/[doc]
  components/ (RiskBar, MegaMenu, Ticker, StatCard, AccountCard, CompareTable,
              InstrumentTable, FAQ, CTABand, TrustStrip, Calculator/*, SessionMap)
  content/{locale}/*.json # copy catalogues generated from this spec
  lib/api.ts lib/analytics.ts lib/ref.ts brand.config.ts
```

DEVELOPER NOTE

Write all copy in this document into the English message catalogue (content/en/*.json) keyed by page and section (e.g. home.hero.headline). Translators and the translation manager (D146) work from those keys. Never hard-code copy in components.

Design tokens & typography

From .superdesign/design-system.md (v2). Use only these tokens: no purple/violet, no blue-SaaS palettes and no other fonts.

Colour tokens: dark (default)

--bg #07070A Page background	--surface #111114 Cards	--surface-2 #17171C Inner rows, inputs, table header	--surface-3 #1E1E24 Hover, pills
--	---	--	--

--ember #FF5A1F Primary CTA, active, glow	--ember-2 #FF8A3D Gradient end	--gold #E9B949 Charts, premium, highlights	--text #F5F5F7 Primary text on dark
--text-2 #A1A1AA Secondary text	--text-3 #63636E Labels, dimmed decimals	--up #22C55E Profit, buy, positive change	--down #F04438 Loss, sell, negative change

Typography

ROLE	FONT	WEBSITE SCALE (DESKTOP / MOBILE)
Display (hero H1)	Geist 600, tracking -2%	64/68 · 40/44
H1 (inner pages)	Geist 600, tracking -1.5%	48/52 · 34/38
H2 (section headline)	Geist 600	36/42 · 28/34
H3 (card title)	Geist 500	20/28 · 18/26
Body large (subheadline)	Geist 400, --text-2	18/28 · 16/26
Body	Geist 400	16/26 · 15/24
Label / eyebrow	Geist 500 uppercase +0.04em (eyebrow +0.12em, ember)	12/16
Numbers (stats, prices)	Geist 600, tabular numerals, decimals dimmed to --text-3	KPI 34/40; hero stats 48/52
Mono (prices, specs, logins, addresses)	Geist Mono 400/500	14/20

Load Geist and Geist Mono with the `geist` npm package (`next/font`), with `font-display: swap` and preloading of the 400/600 weights only. Fallbacks: Inter, system-ui.

Shape, spacing, elevation

- Radius: 20 for cards, 14 for inner rows, 999 for pills, chips, icon buttons and CTAs.
- Spacing: 8px grid; section padding 120px desktop / 72px mobile; card padding 24; gaps 16–20; max content width 1280 (website) with 1600 for full-bleed terminal images.
- Elevation: no hard shadows in dark mode. Depth comes from the card gradient, the brighter top border and the ember glow.
- Highlighted card: an ember→dark gradient with a faint drifting star-particle texture (the Pro account, the final CTA band).

Motion rules

- Ambient glow breathes (opacity .85↔1, 8s ease-in-out, infinite).
- Reveal: fade + 12px rise, 50ms stagger, 400ms, easeOut; triggered once at 20% visibility.
- Numbers count up in 1.2s (easeOutExpo); live prices flash only the changed digits for 400ms.
- CTA shimmer sweep every 6s; hover on cards brightens border-top and adds a cursor spotlight.
- Chart lines draw in over 900ms; gauges sweep over 900ms.
- Reduced motion: disable marquee, parallax, shimmer, particles and count-ups (show final values).

Component inventory

The components the pages in Part B are built from. Build them in `packages/ui` (website namespace) with Storybook stories.

COMPONENT	USED ON	KEY BEHAVIOUR
RiskBar	All pages	Fixed, non-dismissible; text from config with the [XX]% value; short version on mobile.
Header + MegaMenu	All pages	Floating pill; hover-intent 120ms; keyboard navigable (arrow keys, Esc); mobile sheet.
LanguageSelector	Header, footer	Searchable, native names, RTL switch, preserves path.
Hero (variants: home, asset, product, compact)	All pages	Headline reveal, CTAs, media slot, glow.
PriceTicker	Home, markets	Marquee of live quotes; digit flash; static fallback.
StatCard / StatGrid	Home, prop, partners, about	Count-up; hides placeholders that are not confirmed.
AccountCard + CompareTable	Home, accounts	API-driven values; sticky header; mobile column freeze.
InstrumentTable	Markets pages, conditions	Live spreads, spec drawer, search, local-time toggle.
MiniChart / HeroChart	Markets, home	lightweight-charts, gold line, dotted grid, range pills.
Stepper	Funding, copy, prop, home	Numbered steps with an animated connector.
FeatureRow (zig-zag)	Platforms	Image/text alternation with a loop video slot.
PricingSwitcher	Prop	Plan tabs + size slider → rule card.
EarningsEstimator	Partners	Sliders → estimate with a mandatory disclaimer.
Calculator suite	Tools, conditions	Six calculators sharing a spec loader and formatting.
EconomicCalendar	Tools, home card	Filters, impact bars, live actuals.
NewsList + NewsMap	Market news	Tags, pins, session bands.
FAQ (accordion)	Most pages, help	FAQPage JSON-LD; deep-link anchors.
TrustStrip	Home, accounts, funding, why-kalks	Conditional badges (regulator badge hidden until licensed).
CTABand	Most pages	Highlighted card + risk line.
RiskNote	Copy, PAMM, prop, bonus, contests, algo	Body-size text; never collapsed or tooltip-only.
CookieBanner + PreferencesDialog	Global	Consent Mode v2 wiring.
ChatLauncher	Global	Loads the chat widget after the first interaction (performance).

REF D4

DEVELOPER APPENDIX

Image sourcing & art direction

Real, premium, dark and warm. Photography should look like it was shot for Kalks, not taken from a stock catalogue.

Sources

TYPE	SOURCE	RULES
Skylines, desks, cities	Unsplash / Pexels (free licence) or licensed Getty/Adobe Stock for hero images	Reuse the curated photos already in packages/assets (skyline, London, New York, Singapore) for consistency with the Client Area. Keep a licence record per image in assets/LICENSES.md.
People	Licensed stock with model releases, or real Kalks staff	Diverse, professional, natural poses. Never present stock models as clients, masters or staff; add an "Illustrative" label where context could suggest a real person.
Product screenshots	Captured from the real apps (CRM :3000, terminal)	Use seeded demo data (mock names such as Arjun Mehta, logins such as 80412337). Capture at 2× and dark theme. Blur or replace anything resembling real client data.
3D glossy accents	Commissioned or licensed 3D set (coins, BTC coin, shield, trophy, rocket, wallet, bar chart)	Ember/gold palette only; no violet. Export as WebP/AVIF with transparency at 1× and 2×.
Logos	Official brand kits (USDT, TRON, BTC, ETH, SOL, company logos for stocks)	Use for identification only, following each brand's guidelines. TradingView attribution where required.
Flags	flag-icons (circular crop)	SVG, lazy-loaded.

Colour grade

- Lift blacks slightly and crush them toward #07070A; reduce saturation 20–30%; add an ember (#FF5A1F) split-tone in the highlights and a subtle top-down vignette so the page glow blends into the photo.
- Apply the grade consistently with a shared LUT; export in AVIF with a WebP fallback; hero images ≤ 180 KB at 1600px wide.
- Avoid: purple/blue neon, bull/bear statues, piles of cash, luxury-lifestyle imagery (cars, yachts), handshake clichés and casino visuals.

Alt text

Describe what the image shows and why it matters, e.g. “Kalks Web Terminal showing a gold chart with take-profit and stop-loss lines”. Decorative images use empty alt. Alt text must also follow the no-profit-promise rule.

REF D5

DEVELOPER APPENDIX

SEO & structured data

Technical SEO and the schema types assigned to each page in Part B.

Technical SEO

- Titles and meta descriptions exactly as specified per page (the build script enforces title ≤ 60 and description ≤ 155 characters). Translate them per locale, with length checks per language.
- One H1 per page, as specified. Logical H2/H3 hierarchy following the section order.
- Canonical URL on every page. hreflang alternates for every locale plus x-default (English). Locale prefix routing: / (en), /ar/, /es/...
- XML sitemaps split by type (pages, academy, glossary, briefs, legal) with lastmod; robots.txt allows everything except /api, search results and preview routes; 404 and redirect routes are noindex.
- Server-render all indexable content (tables, FAQs, copy). Hydrate live prices after load; never block content on WebSocket data.
- Open Graph and Twitter cards per page: 1200×630 images auto-generated with @veice1/og (dark background, ember glow, page H1, Kalks logo).
- Internal linking: every asset-class page links to account types, conditions and calculators; academy lessons link to relevant market pages and glossary terms.
- Core pages must not be rendered only by client-side JavaScript. Breadcrumbs appear on every inner page.
- Google Search Console and Bing Webmaster verified; submit sitemaps; monitor Core Web Vitals by template.

Structured data (JSON-LD)

```
{
  "@context": "https://schema.org",
  "@type": "FinancialService",
  "name": "Kalks",
  "legalName": "[Company legal name]",
  "url": "https://kalks.com",
  "logo": "https://kalks.com/brand/kalks-logo.png",
  "address": { "@type": "PostalAddress", "streetAddress": "[Registered address]" },
  "contactPoint": [{ "@type": "ContactPoint", "contactType": "customer support",
    "email": "[Support email]", "availableLanguage": ["en","ar","es","hi"] }],
  "sameAs": "[Social profile URLs]"
}
```

SCHEMA	WHERE
Organization / FinancialService	Site-wide (layout), with legal details once confirmed
WebSite + SearchAction	Home (search goes to /help?q=)
BreadcrumbList	Every inner page
FAQPage	Pages with an FAQ section and every Help Centre topic page
Product + Offer	Account types (minimum deposit as price), prop plans (fee)
SoftwareApplication	Platforms pages
Course / ItemList	Academy
DefinedTerm(Set)	Glossary
NewsArticle	Daily brief
JobPosting	Careers (when roles are listed)

COMPLIANCE NOTE

Do not add AggregateRating or Review markup unless it is based on genuine, verifiable reviews collected in line with platform policies and approved by compliance.

Priority keywords (map to pages)

PAGE	PRIMARY KEYWORD	SECONDARY
/	online broker	forex broker, CFD broker, trade gold online
/markets/forex	forex trading	low spread forex broker, forex leverage 1:1000
/markets/metals	trade gold online	XAUUSD trading, gold CFD
/markets/crypto	crypto CFD trading	trade bitcoin with leverage
/accounts	forex account types	ECN account, cent account, swap-free account

PAGE	PRIMARY KEYWORD	SECONDARY
/funding	USDT deposit broker	forex broker USDT TRC20
/prop	prop firm challenge	funded trader program, 1-step challenge
/copy-trading	copy trading	copy trading platform
/partners	forex IB program	forex affiliate program
/tools/economic-calendar	economic calendar	forex calendar

REF D6 DEVELOPER APPENDIX

Performance, accessibility & release checklist

Targets measured on a mid-range Android device over 4G (Lighthouse mobile preset) and on real-user monitoring (RUM).

Performance budget

METRIC	TARGET (P75, MOBILE)
Largest Contentful Paint	≤ 2.0 s
Interaction to Next Paint	≤ 200 ms
Cumulative Layout Shift	≤ 0.05
Time to First Byte	≤ 400 ms (edge cached)
JS on first load (home)	≤ 170 KB gzipped
Lighthouse Performance / SEO / Best Practices / Accessibility	≥ 90 / 100 / 100 / 100

- Static generation + edge caching; stream the live parts (ticker, tables) as client islands.
- Load the WebSocket only after the page is idle; throttle UI updates to 2/s per symbol; pause when the tab is hidden.
- next/image with AVIF/WebP, explicit width/height, lazy-load below the fold, priority for the hero image only.
- Videos: muted, playsinline, poster, preload=none, max 2 MB; no autoplay under reduced motion or Save-Data.
- Fonts: subset Latin + Arabic + Devanagari etc. per locale; preload only the weights used above the fold.
- Third-party scripts (analytics, chat, CMP) are deferred and load after consent where required; chat loads on first interaction.

Accessibility (WCAG 2.2 AA)

- Colour contrast ≥ 4.5:1 for body text (check --text-2 on --surface; use --text for small text on glows).
- Never rely on colour alone for price direction: add ▲/▼ glyphs or +/- signs next to green/red values.
- Keyboard: all menus, tabs, accordions, sliders and calculators are operable; visible focus ring (2px ember outline + 2px offset); skip-to-content link.
- Live price regions are *not* announced continuously (aria-live off); calculators announce results politely.
- Semantic tables with <th scope>; captions for instrument tables.
- Motion: honour prefers-reduced-motion; pause controls for the marquee (WCAG 2.2.2).
- Forms: labels, error messages linked with aria-describedby, no CAPTCHA puzzles without an accessible alternative.
- RTL: logical properties, mirrored icons where directional, numbers kept LTR.
- Target size ≥ 24×24 px (WCAG 2.5.8); language attribute set per page.

Release checklist

1. No [bracketed placeholder] remains in any locale (automated grep in CI fails the build).
2. Every value marked for verification is either API-driven or signed off against the admin configuration.
3. The [XX]% risk figure is set, dated and approved by compliance.
4. Legal documents published from counsel-approved text, with version and effective date.
5. Restricted-country list is identical on the website disclosure and in the Client Area enforcement.
6. Regulator badge and regulation copy hidden unless the licence is live.
7. All CTAs resolve to live app.kalks.com routes with lang/ref/UTM preserved.
8. Consent: no analytics or marketing tags fire before consent (checked with the network panel).
9. Lighthouse and axe checks pass on every template; manual screen-reader pass (VoiceOver, NVDA) on home, accounts and funding.
10. Redirects, sitemap, robots, hreflang and structured data validated (Rich Results Test).
11. Status page, 404 and 500 pages tested; error monitoring (e.g. Sentry) connected.

REF D7 DEVELOPER APPENDIX

Analytics events

Track with a consent-aware analytics layer (GA4 or PostHog/Plausible via Consent Mode). Event names are snake_case; never send PII, email addresses or wallet addresses.

EVENT	TRIGGER	PARAMETERS
page_view	Route change	page_type, locale, ref_present (bool)
cta_click	Any CTA button	cta_label, cta_location (page.section), target_url, account_type?
signup_start	Click to /register on app.kalks.com	source_page, intent (live/demo/partner/prop/copy/pamm/academy), account_type?, plan_id?
login_click	Header or other log-in link	source_page
demo_start	Click to register?type=demo	source_page
terminal_launch	Click to trade.kalks.com	source_page, symbol?
account_type_select	Card or compare-table CTA	account_type
compare_interaction	Compare table: column highlight, “which account” chips	action, value
symbol_click	Ticker, market watch, instrument table	symbol, asset_class, location
market_tab_change	Markets watch tabs	asset_class
calculator_use	First result computed per calculator per session	calculator (position_size, pip_value, margin, profit, swap, converter), symbol
calendar_filter	Calendar filter change	filter_type, value
prop_plan_view	Plan tab / size change	plan_type, account_size
prop_checkout_click	Start challenge CTA	plan_type, account_size, fee
partner_estimator_use	Estimator slider change (debounced)	clients_bucket, lots_bucket, symbol_group
partner_signup_click	Become a partner CTA	source_page
copy_leaderboard_click	Master card click	master_rank, risk_score
faq_expand	FAQ item opened	question_id, page
help_search	Help search submitted (debounced)	query_length, results_count (never the raw query if it may contain PII)
chat_open	Support launcher	source_page
contact_submit	Contact form success	topic
language_change	Language selector	from_locale, to_locale
pwa_install_prompt / pwa_installed	Mobile page install flow	platform
academy_course_view	Course page	course_slug, level
cookie_consent	Consent choice	analytics (bool), marketing (bool)
page_not_found	404 rendered	path, referrer
outbound_click	External links (regulator, social)	url

Funnels and attribution

- Primary funnel: landing → cta_click → signup_start → (app) registration_complete → first_deposit → first_trade. App-side events are tracked by the Client Area and joined by an anonymous visitor ID passed as ?vid= together with UTM and ref.
- Partner attribution: ?ref=CODE stored for 90 days in first-party storage and appended to all app links (essential for the service, disclosed in the Cookie Policy); the IB’s campaign link ID (?cid=) feeds the partner funnel (D62).
- Report weekly: conversion rate by page template and locale, CTA click-through by section, calculator usage, prop plan mix, partner sign-ups.

REF D8 DEVELOPER APPENDIX

Integrations, parameters & configuration

Everything the website reads from the platform, and every setting that belongs in brand.config.ts, so that content never drifts from the product.

Public data endpoints consumed

ENDPOINT	FEEDS	CACHE
GET /public/account-groups	Account cards, comparison table, home preview	5 min
GET /public/symbols?class=	Instrument tables, calculators, spec drawers	5 min
WS /public/quotes	Ticker, market watch, hero charts	live
GET /public/payment-methods	Funding methods table	5 min
GET /public/prop/plans	Prop pricing and rules	5 min
GET /public/ib/levels	Partner commission table and levels	5 min

ENDPOINT	FEEDS	CACHE
GET /public/copy/masters	Copy leaderboard embed	60 s
GET /public/calendar, /public/news, /public/brief	Tools pages, home cards	60 s
GET /public/legal/{doc}?lang=	Legal documents (versioned)	10 min
GET /public/promotions?country=	Promotions grid (geo-filtered)	5 min
GET /public/config	Risk %, restricted countries, support hours, feature flags (module toggles D112)	5 min

brand.config.ts: required keys

```
export const brand = {
  name: "Kalks", domain: "kalks.com", appUrl: "https://app.kalks.com", tradeUrl: "https://trade.kalks.com",
  legalName: "[Company legal name]", regNo: "[Company registration no.]", jurisdiction: "[Jurisdiction]",
  regulator: "[Regulator name]", licenceNo: "[Licence no.]", registeredAddress: "[Registered address]",
  riskPercent: "[XX]", riskPercentUpdated: "YYYY-MM-DD",
  restrictedCountries: "[Restricted countries]",
  supportEmail: "[Support email]", supportPhone: "[Support phone]", supportHours: "[Support hours]",
  socials: "[Social profile URLs]",
  modules: { copy: true, pamm: true, prop: true, api: true, strategyBuilder: true, ib: true, contests: true, bonus: false },
};
```

DEVELOPER NOTE

Module toggles mirror the owner-level module switches (D112). When a module is off, hide its menu items, cards and pages (return 404), so that a white-label tenant without, for example, PAMM never shows it.

URL parameters honoured on the website

PARAMETER	EFFECT
ref	Partner code, persisted 90 days, appended to app links
cid	Partner campaign ID (funnel tracking)
utm_*	Passed through to app links for attribution
lang	Forces the locale on first visit (else the path prefix wins)
symbol	Preselects a symbol on market pages, calculators and terminal links
account	Highlights an account column on /accounts

REF D9 DEVELOPER APPENDIX

Placeholder register

Every fill-in field used in this document, generated automatically from the content. The founder, compliance and legal must supply each value before launch. Search the source HTML for the exact bracketed text to find every occurrence.

NOTE

Values shown with a dotted amber underline are not placeholders. They are proposed product parameters taken from the platform specification and mock data, such as spreads, fees, prop rules and IB rates. Confirm each one against the live admin configuration before publishing, and ideally render it from the pricing/config API instead of hard-coding it.
